“(a) UNIFORMITY REQUIREMENT.—

“(1) IN GENERAL.—Except as provided in subsections (c) and (d), no State or political subdivision of a State may, directly or indirectly, establish or continue in effect under any authority any notification requirement for a food that provides for a warning concerning the safety of the food, or any component or package of the food, unless such a notification requirement has been prescribed under the authority of this Act and the State or political subdivision notification requirement is identical to the notification requirement prescribed under the authority of this Act.

“(2) DEFINITIONS.—For purposes of paragraph (1)—

“(A) the term ‘notification requirement’ includes any mandatory disclosure requfrement relating to the dissemination of information about a food by a manufacturer or distributor of a food in any manner, such as through a label, labeling, poster, public notice, advertising, or any other means of communication, except as provided in paragraph (3);

“(C) a reference to a notification requirement that provides for a warning shall not be construed to refer to any requirement or prohibition relating to food safety that does not involve a notification requirement.

“(3) CONSTRUCTION.—Nothing in this section shall be construed to prohibit a State from conducting the State's notification, disclosure, or other dissemination of information, or to prohibit any action taken relating to a mandatory recall or court injunction involving food adulteration under a State statutory requirement identical to a food adulteration requirement under this Act.

“(b) REVIEW OF EXISTING STATE REQUIREMENTS.—

“(1) EXISTING STATE REQUIREMENTS; DEFERRAL.—Any requirement that—

“(A)(i) is a State notification requirement for a food that provides for a warning described in subsection (a) that does not meet the uniformity requirement specified in subsection (a); or

“(ii) is a State food safety requirement described in paragraph (6) or (7) of section 403A that does not meet the uniformity requirement specified in that paragraph; and

“(B) is in effect on the date of enactment of the National Uniformity for Food Act of 2000,

shall remain in effect for 180 days after that date of enactment.

“(2) STATE PETITIONS.—With respect to a State notification or food safety requirement that is described in paragraph (1), the State may petition the Secretary for an exemption or a national standard under subsection (c). The Secretary may provide such an exemption, under such conditions as the Secretary may impose, for such a requirement that—

“(C) would not unduly burden interstate commerce, balancing the importance of the public interest of the State or political subdivision against the impact on interstate commerce.

“(2) NATIONAL STANDARDS.—Any State may petition the Secretary to establish by regulation a national standard respecting any requirement under this Act or the Fair Packaging and Labeling Act (15 U.S.C. 1451 et seq.) relating to the regulation of a food.

If the Secretary is unable to take final agency action on the petition during the 60-day period, the Secretary shall inform the petitioner, in writing, the reasons that taking the final agency action is not possible, the date by which the final agency action will be taken, and the final agency action that will be taken or is likely to be taken. In every case, the Secretary shall take final agency action on the petition not later than 120 days after the end of the period for public comment.

“(4) JUDICIAL REVIEW.—The failure of the Secretary to comply with any requirement of this subsection shall constitute final agency action for purposes of judicial review. "(B) the State has notified the Secretary about the matter involved and the Secretary has not initiated enforcement action with respect to the matter;

"(C) a petition is submitted by the State under subsection (c) for án exemption or national standard relating to the requirement not later than 30 days after the date that the State establishes the requirement under this subsection; and

"(2) ACTION ON PETITION.—

"(A) IN GENERAL.—The Secretary shall take final agency action on any petition submitted under paragraph (1)(C) not later than 7 days after the petition is received, and the provisions of subsection (c) shall not apply to the petition.

"(g) NO EFFECT ON CERTAIN STATE LAW.—Nothing in this section or section 403A relating to a food shall be construed to prevent a State or political subdivision of a State from establishing, enforcing, or continuing in effect a requirement relating to—

"(1) freshness dating, open date labeling, grade labeling, a State inspection stamp, religious dietary labeling, organic or natural designation, returnable bottle labeling, unit pricing, or a statement of geographic origin; or

"(2) a consumer advisory relating to food sanitation that is imposed on a food establishment, or that is recommended by the Secretary, under part 3-6 of the Food Code issued by the Food and Drug Administration and referred to in the notice published at 64 Fed. Reg. 8576 (1999) (or any corresponding similar provision of such a Code).

(B) any acreage that was prevented from being planted during such crop years to the covered commodity because of drought, flood, or other natural disaster, or other condition beyond the control of the producers on the farm, as determined by the Secretary.

(2) The sum of—

(A) the contract acreage (as defined in section 102 of the Federal Agriculture Improvement and Reform Act of 1996 (7 U.S.C. 7202)) that would have been used by the Secretary to calculate the payment for fiscal year 2002 under such section 102 for the contract commodity on the farm; and

Crop years 1996 or 1997 may be used to subsitute for any one of the crop years described herein in a county provided such county was declared a disaster area during 1 or more of the 4 crop years 1998 through 2001.

(B) Assigned yields.—If, for any of the crop years referred to in subparagraph (A) in which peanuts were planted on a farm by the historic peanut producer, the historic peanut producer has satisfied the eligibility criteria established to carry out section 1102 of the Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 1999 (7 U.S.C. 1421 note; Public Law 105–277), the Secretary shall assign to the historic peanut producer a yield for the farm for the crop year equal to 65 percent of the county yield, as determined by the Secretary.

(2) Acreage average.—The Secretary shall determine, for the historic peanut producer, the 4-year average of—

(A) acreage planted to peanuts on all farms for harvest during the 1998 through 2001 crop years; and

(B) any acreage that was prevented from being planting to peanuts during the crop years because of drought, flood, or other natural disaster, or other condition beyond the control of the historic peanut producer, as determined by the Secretary.

(3) Multiple historic peanut producers.—If more than 1 historic peanut producer shared in the risk of producing the crop on the farm, the historic peanut producers shall receive their proportional share of the number of acres planted (or prevented from being planted) to peanuts for harvest on the farm based on the sharing arrangement that was in effect among the producers for the crop.

(4) Selection by producer.—If a county in which a historic peanut producer described in paragraph (1) is located is declared a disaster area during 1 or more of the 4 crop years described in paragraph (1), for purposes of determining the 4-year average acreage for the historic peanut producer, the historic peanut producer may elect to substitute, for not more than 1 of the crop years during which a disaster is declared—

(A) the State average of acreage actually planted in peanuts; for

(B) the average of acreage for the historic peanut producer determined by the Secretary under paragraph (1).

(5) Time for determinations; factors.—

(A) Timing.—The Secretary shall make the determinations required by this subsection not later than 90 days after the date of the enactment of this Act.

(B) Factors.—In making the determinations, the Secretary shall take into account changes in the number and identity of historic peanut producers sharing in the risk of producing a peanut crop since the 1998 crop year, including providing a method for the assignment of average acres and average yield to a farm when a historic peanut producer is no longer living or an entity composed of historic peanut producers has been dissolved.

(b) Assignment of Yield and Acres to Farms.—

(1) Assignment by historic peanut producers.—The Secretary shall provide each historic peanut producer with an opportunity to assign the average peanut yield and average acreage determined under subsection (a) for the historic peanut producer to cropland on a farm for each crop year through 2006.

(2) Payment yield.—The average of all of the yields assigned by historic peanut producers to a farm shall be considered to be the payment yield for the farm for the purpose of making fixed decoupled payments and counter-cyclical payments under this chapter.

(3) Peanut acres.—Subject to subsection (e), the total number of acres assigned by historic peanut producers to a farm shall be considered to be the peanut acres for the farm for the purpose of making fixed decoupled payments and counter-cyclical payments under this chapter.

(c) Election.—Not later than 180 days after the date of the enactment of this Act, a historic peanut producer shall notify the Secretary of the assignments described in subsection (b) for crop year 2002. For crop years 2003 through 2006 a historic peanut producer shall notify the Secretary of the assignments described in subsection (b) no later than 180 days after January 1 of each year.

(d) Payment Acres.—The payment acres for peanuts on a farm shall be equal to 85 percent of the peanut acres assigned to the farm.

"CHAPTER 4—ENVIRONMENTAL QUALITY INCENTIVES PROGRAM

"SEC. 1240. PURPOSES.

"The purposes of the environmental quality incentives program established by this chapter are to promote agricultural production and environmental quality as compatible national goals, and to maximize environmental benefits per dollar expended, by—

"(1) assisting producers in complying with this title, the Federal Water Pollution Control Act (33 U.S.C. 1251 et seq.), the Safe Drinking Water Act (42 U.S.C. 300f et seq.), the Clean Air Act (42 U.S.C. 7401 et seq.), and other Federal, State, and local environmental laws (including regulations);

"(2) avoiding, to the maximum extent practicable, the need for resource and regulatory programs by assisting producers in protecting soil, water, air, and related natural resources and meeting environmental quality criteria established by Federal, State, and local agencies;

"(3) providing flexible technical and financial assistance to producers to install and maintain conservation systems that enhance soil, water, related natural resources (including grazing land and wetland), and wildlife while sustaining production of food and fiber;

"(4) assisting producers to make beneficial, cost effective changes to cropping systems, grazing management, nutrient management associated with livestock, pest or irrigation management, or other practices on agricultural land;

"(5) facilitating partnerships and joint efforts among producers and governmental and nongovernmental organizations; and

"(6) consolidating and streamlining conservation planning and regulatory compliance processes to reduce administrative burdens on producers and the cost of achieving environmental goals.

"SEC. 1240A. DEFINITIONS.

"In this chapter:

"(1) Eligible land.—The term 'eligible land' means agricultural land (including cropland, rangeland, pasture, private nonindustrial forest land, and other land on which crops or livestock are produced), including agricultural land that the Secretary determines poses a serious threat to soil, water, air, or related resources by reason of the soil types, terrain, climatic, soil, topographic, flood, or saline characteristics, or other factors or natural hazards.

"(2) Land management practice.—The term 'land management practice' means a site-specific nutrient or manure management, integrated pest management, irrigation management, tillage or residue management, grazing management, air quality management, or other land management practice carried out on eligible land that the Secretary determines is needed to protect, in the most cost-effective manner, soil, water, air, or related resources from degradation.

"(3) Livestock.—The term 'livestock' means dairy cattle, beef cattle, laying hens, broilers, turkeys, swine, sheep, and such other animals as determined by the Secretary.

"(4) Maximize environmental benefits per dollar expended.—

"(A) In general.—The term 'maximize environmental benefits per dollar expended' means to maximize environmental benefits to the extent the Secretary determines is practicable and appropriate, taking into account the amount of funding made available to carry out this chapter.

"(B) Limitation.—The term 'maximize environmental benefits per dollar expended' does not require the Secretary—

"(i) to provide the least cost practice or technical assistance; or

"(ii) to require the development of a plan under section 1240E as part of an application for payments or technical assistance.

"(5) Practice.—The term 'practice' means 1 or more structural practices, land management practices, and, as determined by the Secretary, comprehensive nutrient management planning practices.

"(6) Producer.—The term 'producer' means a person that is engaged in livestock or agricultural production, as determined by the Secretary.

"(7) Structural practice.—The term 'structural practice' means—

"(A) the establishment on eligible land of a site-specific animal waste management facility, terrace, grassed waterway, contour grass strip, filterstrip, tailwater pit, permanent wildlife habitat, constructed wetland, or other structural practice that the Secretary determines is needed to protect, in the most cost-effective manner, soil, water, air, or related resources from degradation; and

"(B) the capping of abandoned wells on eligible land.

"SEC. 1240B. ESTABLISHMENT AND ADMINISTRATION OF ENVIRONMENTAL QUALITY INCENTIVES PROGRAM.

"(a) ESTABLISHMENT.—

"(i) a reasonable estimate of the projected cost of the proposals described in the applications; and

"(ii) the priorities established under this subtitle and other factors that maximize environmental benefits per dollar expended.

"(3) CONSENT OF OWNER.—If the producer making an offer to implement a structural practice is a tenant of the land involved in agricultural production, for the offer to be acceptable, the producer shall obtain the consent of the owner of the land with respect to the offer.

"(4) BIDDING DOWN.—If the Secretary determines that the environmental values of 2 or more applications for technical assistance, cost-share payments, or incentive payments are comparable, the Secretary shall not assign a higher priority to the application only because it would present the least cost to the program established under this chapter.

"(d) COST-SHARE PAYMENTS.—

"(1) IN GENERAL.—Except as provided in paragraph (2), the Federal share of cost-share payments to a producer proposing to implement 1 or more practices shall be not more than 75 percent of the projected cost of the practice, as determined by the Secretary.

"(2) EXCEPTIONS.—

SEC. 797. SENSE OF CONGRESS REGARDING DOUBLING OF FUNDING FOR AGRICULTURAL RESEARCH.

It is the sense of Congress that—

(1) Federal funding for food and agricultural research has been essentially constant for 2 decades, putting at risk the scientific base on which food and agricultural advances have been made;

(2) the resulting increase in the relative proportion of private sector, industry investments in food and agricultural research has led to questions about the independence and objectivity of research and outreach conducted by the Federal and university research sectors; and

(3) funding for food and agricultural research should be at least doubled over the next 5 fiscal years—

(A) to restore the balance between public and private sector funding for food and agricultural research; and

(B) to maintain the scientific base on which food and agricultural advances are made.

SEC. 798. PRIORITY FOR FARMERS AND RANCHERS PARTICIPATING IN CONSERVATION PROGRAMS.

In carrying out new on-farm research or extension programs or projects authorized by this Act, an amendment made by this Act, or any Act enacted after the date of enactment of this Act, the Secretary shall give priority in carrying out the programs or projects to using farms or ranches of farmers or ranchers that participate in Federal agricultural conservation programs.

SEC. 798A. ORGANIC PRODUCTION AND MARKET DATA INITIATIVES.

The Secretary shall ensure that segregated data on the production and marketing of organic agricultural products is included in the ongoing baseline of data collection regarding agricultural production and marketing.

SEC. 798B. ORGANICALLY PRODUCED PRODUCT RESEARCH AND EDUCATION.

Not later than July 1, 2002, the Secretary, shall prepare, in consultation with the Advisory Committee on Small Farms, and submit to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate, a report on—

(1) the implementation of the organic rule promulgated under the Organic Foods Production Act of 1990 (7 U.S.C. 6501 et seq.); and

The Secretary, acting through the Agricultural Research Service (including the National Agriculture Library), shall facilitate access by research and extension professionals in the United States to, and the use by those professionals of, organic research conducted outside the United States.

TITLE VIII—FORESTRY

Section 2405(d) of the Food, Agriculture, Conservation, and Trade Act of 1990 (7 U.S.C. 6704(d)) is amended by striking "2002" and inserting "2006".

SEC. 802. MCINTIRE-STENNIS COOPERATIVE FORESTRY RESEARCH PROGRAM.

It is the sense of Congress to reaffirm the importance of Public Law 87–88 (16 U.S.C. 582a et seq.), commonly known as the "McIntire-Stennis Cooperative Forestry Act".

SEC. 803. SUSTAINABLE FORESTRY OUTREACH INITIATIVE; RENEWABLE RESOURCES EXTENSION ACTIVITIES.

(a) SUSTAINABLE FORESTRY OUTREACH INITIATIVE.—The Renewable Resources Extension Act of 1978 is amended by inserting after section 5A (16 U.S.C. 1674a) the following:

"SEC. 5B. SUSTAINABLE FORESTRY OUTREACH INITIATIVE.

"The Secretary shall establish a program, to be known as the 'Sustainable Forestry Outreach Initiative', to educate landowners concerning—

"(1) the value and benefits of practicing sustainable forestry;

"(2) the importance of professional forestry advice in achieving sustainable forestry objectives; and

"(3) the variety of public and private sector resources available to assist the landowners in planning for and practicing sustainable forestry.".

(b) RENEWABLE RESOURCES EXTENSION ACTIVITIES.—

(1) AUTHORIZATION OF APPROPRIATIONS.—Section 6 of the Renewable Resources Extension Act of 1978 (16 U.S.C. 1675) is amended by striking the first sentence and inserting the following: "There is authorized to be appropriated to carry out this Act $30,000,000 for each of fiscal years 2002 through 2006.".

(2) TERMINATION DATE.—Section 8 of the Renewable Resources Extension Act of 1978 (16 U.S.C. 1671 note; Public Law 95–306) is

Section 4 of the Cooperative Forestry Assistance Act of 1978 (16 U.S.C. 2103) is repealed.

SEC. 805. FOREST LAND ENHANCEMENT PROGRAM.

(a) Findings.—Congress finds that—

(1) there is a growing dependence on nonindustrial private forest land to supply the necessary market commodities, and nonmarket values (such as habitat for fish and wildlife, aesthetics, outdoor recreation opportunities, and other forest resources), required by a growing population;

(2) there is a strong demand for expanded assistance programs for owners of nonindustrial private forest land because the majority of the wood supply of the United States is derived from nonindustrial private forest land;

(3) the soil, carbon stores, water quality, and air quality of the United States can be maintained and improved through good stewardship of nonindustrial private forest land;

(4) the products and services resulting from stewardship of nonindustrial private forest land provide income and employment that contribute to the economic health and diversity of rural communities;

(5)(A) wildfires threaten human lives, property, forests, and other resources; and

(B) Federal and State cooperation in forest fire prevention and control has proven effective and valuable, in that properly managed forest stands are less susceptible to catastrophic fire as dramatized by the catastrophic fire seasons of 1998 and 2000;

(6) owners of nonindustrial private forest land are being faced with increased pressure to convert their forest land to development and other uses;

(7)(A) complex, long-rotation forest investments, including sustainable hardwood management, are often the most difficult commitment for owners of small areas of nonindustrial private forest land; and

(B) investments described in subparagraph (A) should receive equal consideration under cost-sharing programs; and

(8) the investment of 1 Federal dollar in State and private forestry programs is estimated to leverage on average $9 from State, local, and private sources.

(b) Purposes.—The purposes of this section are—

(1) to strengthen the commitment of the Department of Agriculture to sustainable forestry; and

(2) to establish a coordinated and cooperative Federal, State, and local sustainable forest program for the establishment, management, maintenance, enhancement, and restoration of forests on nonindustrial private forest land in the United States.

(c) Forest Land Enhancement Program.—The Cooperative Forestry Assistance Act of 1978 (as amended by section 804) is amended by inserting after section 3 (16 U.S.C. 2102) the following:

“(A) the sustainable growth and management of forests for timber production;

“(B) the restoration, use, and enhancement of forest wetland and riparian areas;

“(C) the protection of water quality and watersheds through the application of State-developed forestry best management practices;

SEC. 807. STEWARDSHIP INCENTIVE PROGRAM.

Section 6 of the Cooperative Forestry Assistance Act of 1978 (16 U.S.C. 2103b) is repealed.

SEC. 808. FOREST FIRE RESEARCH CENTERS.

(a) Findings.—Congress finds that—

(1) there is an increasing threat of fire to millions of acres of forest land and rangeland throughout the United States;

(2) this threat is especially great in the interior States of the western United States, where the Forest Service estimates that 39,000,000 acres of National Forest System land are at high risk of catastrophic wildfire;

(3)(A) the degraded condition of forest land and rangeland is often the consequence of land management practices that emphasize the control and prevention of fires; and

(B) the land management practices disrupted the occurrence of frequent low-intensity fires that periodically remove flammable undergrowth;

(4) as a result of the land management practices—

(A) some forest land and rangeland in the United States no longer function naturally as ecosystems; and

(B) drought cycles and the invasion of insects and disease have resulted in vast areas of dead or dying trees, overstocked stands, and the invasion of undesirable species;

(5)(A) population movement into wildland-urban interface areas exacerbate the fire danger;

(B) the increasing number of larger, more intense fires pose grave hazards to human health, safety, property, and infrastructure in the areas; and

(C) smoke from wildfires, which contain fine particulate matter and other hazardous pollutants, pose substantial health risks to people living in the areas;

(6)(A) the budgets and resources of Federal, State, and local entities supporting firefighting efforts have been stretched to their limits;

(B) according to the Comptroller General, the average cost of attempting to put out fires in the interior West grew by 150 percent, from $134,000,000 in fiscal year 1986 to $335,000,000 in fiscal year 1994; and

(C) the costs of preparedness, including the costs of maintaining a readiness force to fight fires, rose about 70 percent, from $189,000,000 in fiscal year 1992 to $326,000,000 in fiscal year 1997;

(7) diminishing Federal resources (including the availability of personnel) have limited the ability of Federal fire researchers—

(A) to respond to management needs; and

(B) to use technological advancements for analyzing fire management costs;

(8) the Federal fire research program is funded at approximately ⅓ of the amount that is required to address emerging fire problems, resulting in the lack of a cohesive strategy to address the threat of catastrophic wildfires; and

(9) there is a critical need for cost-effective investments in improved fire management technologies.

(b) Forest Fire Research Centers.—The Forest and Rangeland Renewable Resources Research Act of 1978 (16 U.S.C. 1641 et seq.) is amended by adding at the end the following:

“SEC. 11. FOREST FIRE RESEARCH CENTERS.

“(a) In General.—Subject to the availability of appropriations, the Secretary of Agriculture, acting through the Chief of the Forest Service (referred to in this section as the ‘Secretary’) shall establish at least 2 forest fire research centers at institutions of higher education (which may include research centers in existence on the date of enactment of this section) that—

“(1) have expertise in natural resource development; and

“(2) are located in close proximity to other Federal natural resource, forest management, and land management agencies.

“(b) Locations.—Of the forest fire research centers established under subsection (a)—

“(1) at least 1 center shall be located in California, Idaho, Montana, Oregon, or Washington; and

“(2) at least 1 center shall be located in Arizona, Colorado, New Mexico, Nevada, or Wyoming.

“(c) Duties.—At each of the forest fire research centers established under subsection (a), the Secretary shall provide for—

“(1) the conduct of integrative, interdisciplinary research into the ecological, socioeconomic, and environmental impact of fire control and the use of management of ecosystems and landscapes to facilitate fire control; and

“(2) the development of mechanisms to rapidly transfer new fire control and management technologies to fire and land managers.

"(d) Advisory Committee.—

"(1) In general.—The Secretary, in consultation with the Secretary of the Interior, shall establish a committee composed of fire and land managers and fire researchers to determine the areas of emphasis and establish priorities for research projects conducted at forest fire research centers established under subsection (a).

"(2) Administration.—The Federal Advisory Committee Act (5 U.S.C. App.) and section 102 of the Agricultural Research, Extension, and Education Reform Act of 1998 (7 U.S.C. 7612) shall not apply to the committee established under paragraph (1).

"(e) Authorization of Appropriations.—There are authorized to be appropriated such sums as are necessary to carry out this section.".

SEC. 809. WILDFIRE PREVENTION AND HAZARDOUS FUEL PURCHASE PROGRAM.

(a) Findings.—Congress finds that—

(1) the damage caused by wildfire disasters has been equivalent in magnitude to the damage resulting from the Northridge earthquake, Hurricane Andrew, and the recent flooding of the Mississippi River and the Red River;

(2) more than 20,000 communities in the United States are at risk from wildfire and approximately 11,000 of those communities are located near Federal land;

(3) the accumulation of heavy forest fuel loads continues to increase as a result of disease, insect infestations, and drought, further increasing the risk of fire each year;

(4) modification of forest fuel load conditions through the removal of hazardous fuels would—

(A) minimize catastrophic damage from wildfires;

(B) reduce the need for emergency funding to respond to wildfires; and

(C) protect lives, communities, watersheds, and wildlife habitat;

(5) the hazardous fuels removed from forest land represent an abundant renewable resource, as well as a significant supply of biomass for biomass-to-energy facilities;

(6) the United States should invest in technologies that promote economic and entrepreneurial opportunities in processing forest products removed through hazardous fuel reduction activities; and

(7) the United States should—

(A) develop and expand markets for traditionally underused wood and other biomass as an outlet for value-added excessive forest fuels; and

(B) commit resources to support planning, assessments, and project reviews to ensure that hazardous fuels management is accomplished expeditiously and in an environmentally sound manner.

(b) Wildfire Prevention and Hazardous Fuel Purchase Program.—The Cooperative Forestry Assistance Act of 1978 is amended by inserting after section 6 (16 U.S.C. 2103b) the following:

"SEC. 6A. WILDFIRE PREVENTION AND HAZARDOUS FUEL PURCHASE PROGRAM.

"(a) Definitions.—In this section:

"(1) Biomass-to-energy facility.—The term 'biomass-to-energy facility' means a facility that uses forest biomass or other biomass as a raw material to produce electric energy, useful heat, or a transportation fuel.

"(2) Eligible community.—The term 'eligible community' means—

"(A) any town, township, municipality, or other similar unit of local government (as determined by the Secretary), or any area represented by a nonprofit corporation or institution organized under Federal or State law to promote broad-based economic development, that—

"(i) has a population of not more than 10,000 individuals;

"(ii) is located within a county in which at least 15 percent of the total primary and secondary labor and proprietor income is derived from forestry, wood products, and forest-related industries, such as recreation, forage production, and tourism; and

"(iii) is located adjacent to public or private forest land, the condition of which land the Secretary determines poses a substantial present or potential hazard to the safety of—

"(I) a forest ecosystem;

"(II) wildlife; or

"(III) in the case of a wildfire, human, community, or firefighter safety, in a year in which drought conditions are present; and

"(B) any county that is not contained within a metropolitan statistical area that meets the conditions described in clauses (ii) and (iii) of subparagraph (A).

"(3) Forest biomass.—The term 'forest biomass' means fuel and biomass accumulation from precommercial thinnings, slash, and brush on public or private forest land.

"(4) Hazardous fuel.—The term 'hazardous fuel' means any excessive accumulation of forest biomass on public or private forest land (especially land in an urban-wildland interface area or in an area that is located near an eligible community and designated as condition class 2 or 3 under the report of the Forest Service entitled 'Protecting People and Sustainable Resources in Fire-Adapted Ecosystems', dated October 13, 2000) that the Secretary determines poses a substantial present or potential hazard—

"(A) to the safety of a forest ecosystem;

"(B) to the safety of wildlife; or

"(C) in the case of wildfire in a year in which drought conditions are present, to human, community, or firefighter safety.

"(5) Indian tribe.—The term 'Indian tribe' has the meaning given the term in section 4 of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450b).

"(6) Secretary.—The term 'Secretary' means—

"(A) the Secretary of Agriculture (or a designee), with respect to National Forest System land and private land in the United States; and

"(B) the Secretary of the Interior (or a designee) with respect to Federal land under the jurisdiction of the Secretary of the Interior or an Indian tribe.

"(b) Hazardous Fuel Grant Program.—

"(1) Grants.—

"(A) In general.—Subject to the availability of appropriations, the Secretary may make grants to persons that operate biomass-to-energy facilities to offset the costs incurred by those persons in purchasing hazardous fuels derived from public and private forest land adjacent to eligible communities.

"(B) Selection criteria.—The Secretary shall select recipients for grants under subparagraph (A) based on—

"(i) planned purchases by the recipients of hazardous fuels, as demonstrated by the recipient through the submission to the Secretary of such assurances as the Secretary may require; and

"(ii) the level of anticipated benefits of those purchases in reducing the risk of wildfires.

"(2) Grant amounts.—

"(A) In general.—A grant under this subsection shall—

"(i) be based on—

"(I) the distance required to transport hazardous fuels to a biomass-to-energy facility; and

"(II) the cost of removal of hazardous fuels; and

"(ii) be in an amount that is at least equal to the product obtained by multiplying—

"(I) the number of tons of hazardous fuels delivered to a grant recipient; by

"(II) an amount that is at least $5 but not more than $10 per ton of hazardous fuels, as determined by the Secretary taking into consideration the factors described in clause (i).

"(i) In general.—Except as provided in clause (ii), a grant under subparagraph (A) shall not exceed $1,500,000 for any biomass-to-energy facility for any fiscal year.

"(ii) Small biomass-to-energy facilities.—A biomass-to-energy facility that has an annual production of 5 megawatts or less shall not be subject to the limitation under clause (i).

"(3) Monitoring of grant recipient activities.—

"(A) In general.—As a condition of receipt of a grant under this subsection, a grant recipient shall keep such records as the Secretary may require, including records that—

"(i) completely and accurately disclose the use of grant funds; and

"(ii) describe all transactions involved in the purchase of hazardous fuels.

"(B) Access.—On notice by the Secretary, the operator of a biomass-to-energy facility that purchases and uses hazardous fuels with funds from a grant under this subsection shall provide the Secretary with—

"(i) reasonable access to the biomass-to-energy facility; and

"(ii) an opportunity to examine the inventory and records of the biomass-to-energy facility.

"(4) Monitoring of effect of treatments.—The Secretary shall monitor Federal land from which hazardous fuels are removed and sold to a biomass-to-energy facility under this subsection to determine and document the reduction in fire hazards on that land.

"(5) Authorization of appropriations.—There is authorized to be appropriated to carry out this subsection $50,000,000 for each of fiscal years 2002 through 2006.

"(c) Long-Term Forest Stewardship Contracts for Hazardous Fuels Removal.—

"(1) Annual assessment of treatment acreage.—

"(A) In general.—Subject to the availability of appropriations, not later than March 1 of each of fiscal years 2002 through 2006, the Secretary of Agriculture and the Secretary of Energy shall jointly submit to Congress an assessment of the number of acres of Federal forest land recommended to be treated during the subsequent fiscal year using stewardship end result contracts authorized by paragraph (3).

"(B) Components.—The assessment shall—

"(i) be based on the treatment schedules contained in the report entitled 'Protecting People and Sustaining Resources in Fire-Adapted Ecosystems', dated October 13, 2000, and incorporated into the National Fire Plan (as identified by the Secretary);

"(ii) identify the acreage by condition class, type of treatment, and treatment year to achieve the restoration goals outlined in the report within 10-, 15-, and 20-year time periods;

"(iii) give priority to condition class 3 areas (as described in subsection (a)(4)(A)), including modifications in the restoration goals based on the effects of—

"(I) fire;

"(III) updates in data;

"(iv) provide information relating to the type of material and estimated quantities and range of sizes of material that shall be included in the treatments;

"(v) describe the management area prescriptions in the applicable land and resource management plan for the land on which the treatment is recommended; and

"(vi) give priority to areas described in subsection (a)(4)(A).

"(2) FUNDING RECOMMENDATION.—The Secretary shall include in the annual assessment under paragraph (1) a request for funds sufficient to implement the recommendations contained in the assessment using stewardship end result contracts described in paragraph (3) in any case in which the Secretary determines that the objectives of the National Fire Plan (as identified by the Secretary) would best be accomplished through forest stewardship end result contracting.

"(3) STEWARDSHIP END RESULT CONTRACTING.—

"(A) IN GENERAL.—Subject to the availability of appropriations, the Secretary may enter into stewardship end result contracts to implement the National Fire Plan (as identified by the Secretary) on National Forest System land based on the treatment schedules provided in the annual assessments conducted under paragraph (1)(B)(i).

"(B) PERIOD OF CONTRACTS.—The contracting goals and authorities described in subsections (b) through (g) of section 347 of the Department of the Interior and Related Agencies Appropriations Act, 1999 (commonly known as the 'Stewardship End Result Contracting Demonstration Project') (16 U.S.C. 2104 note; Public Law 105–277), shall apply to contracts entered into under this paragraph, except that the period of each such contract shall not exceed 10 years.

"(C) STATUS REPORT.—Beginning with the assessment required under paragraph (1) for fiscal year 2003, the Secretary shall include in the annual assessment under paragraph (1) a status report of the stewardship end result contracts entered into under this paragraph.

"(4) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this subsection such sums as are necessary for each of fiscal years 2002 through 2006.

"(d) TERMINATION OF AUTHORITY.—The authority provided under this section shall terminate on September 30, 2006.".

SEC. 810. ENHANCED COMMUNITY FIRE PROTECTION.

(a) FINDINGS.—Congress finds that—

(1) the severity and intensity of wildfires have increased dramatically over the past few decades as a result of past fire and land management policies;

(2) the record 2000 fire season is a prime example of what can be expected if action is not taken to reduce the risk of catastrophic wildfires;

(3) wildfires threaten not only the forested resources of the United States, but also the thousands of communities intermingled with wildland in the wildland-urban interface;

(4) wetland forests provide essential ecological services, such as filtering pollutants, buffering important rivers and estuaries, and minimizing flooding, that make the protection and restoration of those forests worthy of special focus;

(5) the National Fire Plan, if implemented to achieve appropriate priorities, is the proper, coordinated, and most effective means to address the issue of wildfires;

(6) while adequate authorities exist to address the problem of wildfires at the landscape level on Federal land, there is limited authority to take action on most private land where the largest threat to life and property lies; and

(7) there is a significant Federal interest in enhancing the protection of communities from wildfire.

(b) ENHANCED COMMUNITY FIRE PROTECTION.—The Cooperative Forestry Assistance Act of 1978 is amended by inserting after section 10 (16 U.S.C. 2106) the following:

"SEC. 10A. ENHANCED COMMUNITY FIRE PROTECTION.

"(a) COOPERATIVE MANAGEMENT RELATING TO WILDFIRE THREATS.—Notwithstanding section 7 of the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2206), the Secretary may cooperate with State foresters and equivalent State officials to—

"(1) assist in the prevention, control, suppression, and prescribed use of fires (including through the provision of financial, technical, and related assistance);

"(2) protect communities from wildfire threats;

"(3) enhance the growth and maintenance of trees and forests in a manner that promotes overall forest health; and

"(4) ensure the continued production of all forest resources, including timber, outdoor recreation opportunities, wildlife habitat, and clean water, through conservation of forest cover on watersheds, shelterbelts, and windbreaks.

"(b) COMMUNITY AND PRIVATE LAND FIRE ASSISTANCE PROGRAM.—

"(1) IN GENERAL.—The Secretary shall establish a program to be known as the 'community and private land fire assistance program' (referred to in this section as the 'Program')—

"(A) to focus the Federal role in promoting optimal firefighting efficiency at the Federal, State, and local levels;

"(B) to provide increased assistance to Federal projects that establish landscape level protection from wildfires;

"(C) to expand outreach and education programs concerning fire prevention to homeowners and communities; and

"(D) to establish defensible space against wildfires around the homes and property of private landowners.

"(2) ADMINISTRATION AND IMPLEMENTATION.—The Program shall be administered by the Secretary and, with respect to non-Federal land described in paragraph (3), carried out through the State forester or equivalent State official.

"(3) COMPONENTS.—The Secretary may carry out under the Program, on National Forest System land and non-Federal land determined by the Secretary in consultation with State foresters and Committees—

"(A) fuel hazard mitigation and prevention;

"(B) invasive species management;

"(C) multiresource wildfire and community protection planning;

"(D) community and landowner education enterprises, including the program known as 'FIREWISE';

"(E) market development and expansion;

"(F) improved use of wood products; and

"(G) restoration projects.

"(4) PRIORITY.—In entering into contracts to carry out projects under the Program, the Secretary shall give priority to contracts with local persons or entities.

"(c) AUTHORITY.—The authority provided under this section shall be in addition to any authority provided under section 10.

"(d) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Secretary to carry out this section $35,000,000 for each of fiscal years 2002 through 2006.".

SEC. 811. WATERSHED FORESTRY ASSISTANCE PROGRAM.

(a) FINDINGS.—Congress finds that—

(1) there has been a dramatic shift in public attitudes and perceptions about forest management, particularly in the understanding and practice of sustainable forest management;

(2) it is commonly recognized that proper stewardship of forest land is essential to—

(A) sustain and restore watershed health;

(B) produce clean water; and

(C) maintain healthy aquatic systems;

(3) forests are increasingly important to the protection and sustainability of drinking water supplies for more than 1/2 of the population of the United States;

(4) forest loss and fragmentation in urbanizing areas are contributing to flooding, degradation of urban stream habitat and water quality, and public health concerns;

(5) scientific evidence and public awareness with respect to the manner in which forest management can positively affect water quality and quantity, and the manner in which trees, forests, and forestry practices (such as forest buffers) can serve as solutions to water quality problems in rural and urban areas, are increasing;

(6) the application of forestry best management practices developed at the State level has been found to greatly facilitate the achievement of water quality goals;

(7) significant efforts are underway to revisit and make improvements on needed forestry best management practices;

(8) according to the report of the Forest Service numbered FS–660 and entitled "Water and the Forest Service", forests are a requirement for maintenance of clean water because—

(A) approximately 66 percent of the freshwater resources of the United States originate on forests; and

(B) forests cover approximately 1/3 of the land area of the United States;

(9) because almost 500,000,000 acres, or approximately 2/3, of the forest land of the United States is owned by non-Federal entities, a significant burden is placed on private forest landowners to provide or maintain the clean water needed by the public for drinking, swimming, fishing, and a number of other water uses;

(10) because the decisions made by individual landowners and communities will affect the ability to maintain the health of rural and urban watersheds in the future, there is a need to integrate forest management, conservation, restoration, and stewardship in watershed management;

(11) although water management is the primary responsibility of States, the Federal Government has a responsibility to promote and encourage the ability of States and private forest landowners to sustain the delivery of clean, abundant water from forest land;

(12) as of the date of enactment of this Act, the availability of Federal assistance to support forest landowners to achieve the water goals identified in many Federal laws (including regulations) is lacking; and

(13) increased research for, education for, and technical and financial assistance provided to, forest landowners and communities

that relate to the protection of watersheds and improvement of water quality, are needed to realize the expectations of the general public for clean water and healthy aquatic systems.

(b) Purposes.—The purposes of this section are to—

(1) improve the understanding of landowners and the public with respect to the relationship between water quality and forest management;

(2) encourage landowners to maintain tree cover and use tree plantings and vegetative treatments as creative solutions to water quality and quantity problems associated with varying land uses;

(3) enhance and complement source water protection in watersheds that provide drinking water for municipalities;

(4) establish new partnerships and collaborative watershed approaches to forest management, stewardship, and protection; and

(5) provide technical and financial assistance to States to deliver a coordinated program that through the provision of technical, financial, and educational assistance to qualified individuals and entities—

(A) enhances State forestry best management practices programs; and

(B) protects and improves water quality on forest land.

(c) Program.—The Cooperative Forestry Assistance Act of 1978 is amended by inserting after section 5A (as added by section 806) the following:

‘‘SEC. 5B. WATERSHED FORESTRY ASSISTANCE PROGRAM.

‘‘(a) Establishment.—Subject to the availability of appropriations, the Secretary shall establish a watershed forestry assistance program (referred to in this section as the ‘program’) to provide to States, through State foresters (as defined in section 4), technical, financial, and related assistance to—

‘‘(1) expand forest stewardship capacities and activities through State forestry best management practices and other means at the State level; and

‘‘(2) prevent water quality degradation, and address watershed issues, on non-Federal forest land.

‘‘(b) Watershed Forestry Education, Technical Assistance, and Planning.—

‘‘(1) Plan.—

‘‘(A) In general.—In carrying out the program, the Secretary shall cooperate with State foresters to develop a plan, to be administered by the Secretary and implemented by State foresters, to provide technical assistance to assist States in preventing and mitigating water quality degradation.

‘‘(B) Participation.—In developing the plan under subparagraph (A), the Secretary shall encourage participation of interested members of the public (including nonprofit private organizations and local watershed councils).

‘‘(2) Components.—The plan described in paragraph (1) shall include provisions to—

‘‘(A) build and strengthen watershed partnerships focusing on forest land at the national, State, regional, and local levels;

‘‘(B) provide State forestry best management practices and water quality technical assistance directly to private landowners;

‘‘(C) provide technical guidance relating to water quality management through forest management in degraded watersheds to land managers and policymakers;

‘‘(D)(i) complement State nonpoint source assessment and management plans established under section 319 of the Federal Water Pollution Control Act (33 U.S.C. 1329); and

‘‘(ii) provide enhanced opportunities for coordination and cooperation among Federal and State agencies having responsibility for water and watershed management under that Act; and

‘‘(E) provide enhanced forest resource data and support for improved implementation of State forestry best management practices, including—

‘‘(i) designing and conducting effectiveness and implementation studies; and

‘‘(ii) meeting in-State water quality assessment needs, such as the development of water quality models that correlate the management of forest land to water quality measures and standards.

‘‘(c) Watershed Forestry Cost-Share Program.—

‘‘(1) Establishment.—In carrying out the program, the Secretary shall establish a watershed forestry cost-share program, to be administered by the Secretary and implemented by State foresters, to provide grants and other assistance for eligible programs and projects described in paragraph (2).

‘‘(2) Eligible programs and projects.—A community, nonprofit group, or landowner may receive a grant or other assistance under this subsection to carry out a State forestry best management practices program or a watershed forestry project if the program or project, as determined by the Secretary—

‘‘(A) is consistent with—

‘‘(i) State nonpoint source assessment and management plan objectives established under section 319 of the Federal Water Pollution Control Act (33 U.S.C. 1329); and

‘‘(ii) the cost-share requirements of this section; and

‘‘(B) is designed to address critical forest stewardship, watershed protection, and restoration needs of a State through—

‘‘(i) the use of trees and forests as solutions to water quality problems in urban and agricultural areas;

‘‘(ii) community-based planning, involvement, and action through State, local and nonprofit partnerships;

‘‘(iii) the application of and dissemination of information on forestry best management practices relating to water quality;

‘‘(iv) watershed-scale forest management activities and conservation planning; and

‘‘(v) the restoration of wetland and stream side forests and establishment of riparian vegetative buffers.

‘‘(3) Allocation.—

‘‘(A) In general.—After taking into consideration the criteria described in subparagraph (B), the Secretary shall allocate among States, for award by State foresters under paragraph (4), the amounts made available to carry out this subsection.

‘‘(B) Criteria.—The criteria referred to in subparagraph (A) are—

‘‘(i) the number of acres of forest land, and land that could be converted to forest land, in each State;

‘‘(ii) the nonpoint source assessment and management plans of each State, as developed under section 319 of the Federal Water Pollution Control Act (33 U.S.C. 1329);

‘‘(iii) the acres of wetland forests that have been lost or degraded or cases in which forests may play a role in restoring wetland resources;

‘‘(iv) the number of non-Federal forest landowners in each State; and

‘‘(v) the extent to which the priorities of States are designed to achieve a reasonable range of the purposes of the program and, as a result, contribute to the water-related goals of the United States.

‘‘(4) Award of grants and assistance.—

‘‘(A) In general.—In implementing the program under this subsection, the State forester, in coordination with the State Coordinating Committee established under section 19(b), shall provide annual grants and cost-share assistance to communities, nonprofit groups, and landowners to carry out eligible programs and projects described in paragraph (2).

‘‘(B) Application.—A community, nonprofit group, or landowner that seeks to receive cost-share assistance under this subsection shall submit to the State forester an application, in such form and containing such information as the State forester may prescribe, for the assistance.

‘‘(C) Prioritization.—In awarding cost-share assistance under this subsection, the Secretary shall give priority to eligible programs and projects that are identified by the State foresters and the State Stewardship Committees as having a greater need for assistance.

‘‘(D) Award.—On approval by the Secretary of an application under subparagraph (B), the State forester shall award to the applicant, from funds allocated to the State under paragraph (3), such amount of cost-share assistance as is requested in the application.

‘‘(5) Cost sharing.—

‘‘(A) Federal share.—The Federal share of the cost of carrying out any eligible program or project under this subsection shall not exceed 75 percent, of which not more than 50 percent may be in the form of assistance provided under this subsection.

‘‘(B) Non-federal share.—The non-Federal share of the cost of carrying out any eligible program or project under this subsection may be provided in the form of cash, services, or in-kind contributions.

‘‘(d) Watershed Forester.—A State may use a portion of the funds made available to the State under subsection (e) to establish and fill a position of ‘Watershed Forester’ to lead State-wide programs and coordinate watershed-level projects.

‘‘(e) Funding.—

‘‘(1) In general.—There are authorized to be appropriated to carry out this section $20,000,000 for each of fiscal years 2002 through 2006.

‘‘(2) Allocation.—Of the funds made available under paragraph (1)—

‘‘(A) 75 percent shall be used to carry out subsection (c); and

‘‘(B) 25 percent shall be used to carry out provisions of this section other than subsection (c).’’.

SEC. 812. GENERAL PROVISIONS.

Section 13 of the Cooperative Forestry Assistance Act of 1978 (16 U.S.C. 2109) is amended by striking subsection (f) and inserting the following:

‘‘(f) Grants, Contracts, and Other Agreements.—

‘‘(1) In general.—In accordance with paragraph (2), the Secretary may make such grants and enter into such contracts, agreements, or other arrangements as the Secretary determines are necessary to carry out this Act.

‘‘(2) Assistance.—Notwithstanding any other provision of this Act, the Secretary, with the concurrence of the applicable State forester or equivalent State official, may provide assistance under this Act directly to any public or private entity, organization, or individual—

‘‘(A) through a grant; or

‘‘(B) by entering into a contract or cooperative agreement.’’.

SEC. 813. STATE FOREST STEWARDSHIP COORDINATING COMMITTEES.

Section 19(b) of the Cooperative Forestry Assistance Act of 1978 (16 U.S.C. 2113(b)) is amended—

(1) in paragraph (1)(B)(i), by inserting "United States Fish and Wildlife Service," before "Forest Service"; and

(2) in paragraph (2)—

(A) in subparagraph (C), by striking "and" at the end;

(B) in subparagraph (D), by striking the period at the end and inserting "; and"; and

(C) by adding at the end the following:

"(E) submit to the Secretary, the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate, an annual report that provides—

"(i) the list of members on the Committee described in paragraph (1)(B); and

"(ii) for those members that may be included on the Committee, but are not included because a determination that it is not practicable to include the members has been made, an explanation of the reasons for that determination.".

TITLE IX—ENERGY

SEC. 901. FINDINGS.

Congress finds that—

(1) there are many opportunities for the agricultural sector and rural areas to produce renewable energy and increase energy efficiency;

(2) investments in renewable energy and energy efficiency—

(A) enhance the energy security and independence of the United States;

(B) increase farmer and rancher income;

(C) promote rural economic development;

(D) provide environmental and public health benefits such as cleaner air and water; and

(E) improve electricity grid reliability, thereby reducing the likelihood of blackouts and brownouts, particularly during peak usage periods;

(3) the public strongly supports renewable energy generation and energy efficiency improvements as an important component of a national energy strategy;

(4)(A) the Federal Government is the country's largest consumer of a vast array of products, spending in excess of $200,000,000,000 per year;

(B) purchases and use of products by the Federal Government have a significant effect on the environment; and

(C) accordingly, the Federal Government should lead the way in purchasing biobased products so as to minimize environmental impacts while supporting domestic producers of biobased products;

(5) the agricultural sector is a leading producer of biobased products to meet domestic and international needs;

(6) agriculture can play a significant role in the development of fuel cell and hydrogen-based energy technologies, which are critical technologies for a clean energy future;

(7)(A) wind energy is 1 of the fastest growing clean energy technologies; and

(B) there are tremendous economic development and environmental quality benefits to be achieved by developing both large-scale and small-scale wind power projects on farms and in rural communities;

(8) farm-based renewable energy generation can become one of the major cash crops of the United States, improving the livelihoods of hundreds of thousands of family farmers, ranchers, and others and revitalizing rural communities;

(9)(A) evidence continues to mount that increases in atmospheric concentrations of greenhouse gases are contributing to global climate change; and

(B) agriculture can help in climate change mitigation by—

(i) storing carbon in soils, plants, and forests;

(ii) producing biofuels, chemicals, and power to replace fossil fuels and petroleum-based products; and

(iii) reducing emissions by capturing gases from animal feeding operations, changing agricultural land practices, and becoming more energy efficient;

(10) because agricultural production is energy-intensive; it is incumbent on the Federal Government to aid the agricultural sector in reducing energy consumption and energy costs;

(11)(A) one way to help farmers, ranchers, and others reduce energy use is through professional energy audits;

(B) energy audits provide recommendations for improved energy efficiency that, when acted on, offer an effective means of reducing overall energy use and saving money; and

(C) energy savings of 10 to 30 percent can typically be achieved, and greater savings are often realized;

(12) rural electric utilities are often geographically well situated to develop renewable and distributed energy supplies, enabling the utilities to diversify their energy portfolios and afford their members or customers alternative energy sources, which many such members and customers desire;

(13) fuel cells are a highly efficient, clean, and flexible technology for generating electricity from hydrogen that promises to improve the environment, electricity reliability, and energy security;

(14)(A) because fuel cells can be made in any size, fuel cells can be used for a wide variety of farm applications, including powering farm vehicles, equipment, houses, and other operations; and

(B) much of the initial use of fuel cells is likely to be in remote and off-grid applications in rural areas; and

(15) hydrogen is a clean and flexible fuel that can play a critical role in storing and transporting energy produced on farms from renewable sources (including biomass, wind, and solar energy).

SEC. 902. CONSOLIDATED FARM AND RURAL DEVELOPMENT ACT.

The Consolidated Farm and Rural Development Act (as amended by section 646) is amended by adding at the end the following:

SEC. 905. CARBON SEQUESTRATION DEMONSTRATION PROGRAM.

(a) FINDINGS.—Congress finds that—

(1) greenhouse gas emissions resulting from human activity present potential risks and potential opportunities for agricultural and forestry production;

(2) there is a need to identify cost-effective methods that can be used in the agricultural and forestry sectors to reduce the threat of climate change;

(3) deforestation and other land use changes account for approximately 1,600,000,000 of the 7,900,000,000 metric tons of the average annual worldwide quantity of carbon emitted during the 1990s;

(4) ocean and terrestrial systems each sequestered approximately 2,300,000,000 metric tons of carbon annually, resulting in a sequestration of 60 percent of the annual human-induced emissions of carbon during the 1990s;

(5) there are opportunities for increasing the quantity of carbon that can be stored in terrestrial systems through improved,

human-induced agricultural and forestry practices;

(6) increasing the carbon content of soil helps to reduce erosion, reduce flooding, minimize the effects of drought, prevent nutrients and pesticides from washing into water bodies, and contribute to water infiltration, air and water holding capacity, and good seed germination and plant growth;

(7) tree planting and wetland restoration could play a major role in sequestering carbon and reducing greenhouse gas concentrations in the atmosphere;

(8) nitrogen management is a cost-effective method of addressing nutrient overenrichment in the estuaries of the United States and of reducing emissions of nitrous oxide;

(9) animal feed and waste management can be cost-effective methods to address water quality issues and reduce emissions of methane; and

(10) there is a need to—

(A) demonstrate that carbon sequestration in soils, plants, and forests and reductions in greenhouse gas emissions through nitrogen and animal feed and waste management can be measured and verified; and

(B) develop and refine quantification, verification, and auditing methodologies for carbon sequestration and greenhouse gas emission reductions on a project by project basis.

(b) Program.—Title IV of the Agricultural Research, Extension, and Education Reform Act of 1998 (7 U.S.C. 7621 et seq.) is amended by adding at the end the following:

"SEC. 409. CARBON SEQUESTRATION DEMONSTRATION PROGRAM.

"(a) Definitions.—In this section:

"(1) Eligible project.—The term 'eligible project' means a project that is likely to result in—

"(A) demonstrable reductions in net emissions of greenhouse gases; or

"(B) demonstrable net increases in the quantity of carbon sequestered in soils and forests.

"(2) Panel.—The term 'panel' means the panel of experts established under subsection (b)(4)(A).

"(3) Secretary.—The term 'Secretary' means the Secretary of Agriculture, acting in consultation with—

"(b) Demonstration Program.—

"(1) Establishment.—Subject to the availability of appropriations, the Secretary shall establish a program to provide grants, on a competitive, cost-shared basis, to agricultural producers to assist in paying the costs incurred in measuring, estimating, monitoring, verifying, auditing, and testing methodologies involved in public-private partnerships for measurement and monitoring of greenhouse gas fluxes (including costs incurred in employing certified independent third persons to carry out those activities).

"(2) Conditions for receipt of grant.—As a condition of the acceptance of a grant under paragraph (1), an agricultural producer shall—

"(A) establish a carbon and greenhouse gas monitoring, verification, and reporting system that meets such requirements as the Secretary shall prescribe; and

"(B) under the system and through the use of an independent third party for any necessary monitoring, verifying, reporting, and auditing, measure and report to the Secretary the quantity of carbon sequestered, or the quantity of greenhouse gas emissions reduced, as a result of the conduct of an eligible project.

"(3) Criteria for award of grant.—

"(A) In general.—In awarding a grant for an eligible project under paragraph (1), the Secretary shall take into consideration—

"(i) the likelihood of the eligible project in succeeding in achieving greenhouse gas emissions reductions and net carbon sequestration increases; and

"(ii) the usefulness of the information to be obtained from the eligible project in determining how best to quantify, monitor, and verify sequestered carbon or reductions in greenhouse gas emissions.

"(B) Priority criteria.—The Secretary shall give priority in awarding a grant under paragraph (1) to an eligible project that—

"(i) involves multiple parties, a whole farm approach, or any other approach, such as the aggregation of land areas, that would—

"(I) increase the environmental benefits or reduce the transaction costs of the eligible project; and

"(II) reduce the costs of measuring, monitoring, and verifying any net sequestration of carbon or net reduction in greenhouse gas emissions;

"(ii) is designed to achieve long-term sequestration of carbon or long-term reductions in greenhouse gas emissions;

"(iii) is designed to address concerns concerning leakage;

"(iv) provides certain other benefits, such as improvements in—

"(I) soil fertility;

"(II) wildlife habitat;

"(III) water quality;

"(IV) soil erosion management;

"(V) the use of renewable resources to produce energy;

"(VI) the avoidance of ecosystem fragmentation; and

"(VII) the promotion of ecosystem restoration with native species; or

"(v) does not involve the conversion of native forest land or native grassland.

"(4) Panel.—

"(A) In general.—The Secretary shall establish a panel to provide advice and recommendations to the Secretary with respect to criteria for awarding grants under this subsection.

"(B) Composition.—The panel shall be composed of the following representatives, to be appointed by the Secretary:

"(i) Experts from each of—

"(I) the Department;

"(II) the Environmental Protection Agency; and

"(III) the Department of Energy.

"(ii) Experts from nongovernmental and academic entities.

"(5) Payment of grant funds.—The Secretary shall provide a grant awarded under this section in such number of installments as is necessary to ensure proper implementation of an eligible project.

"(c) Methodology Grant Program.—

"(1) Establishment.—The Secretary shall establish a program to provide grants to determine the best methodologies for estimating and measuring increases or decreases in—

"(A) agricultural greenhouse gas emissions; and

"(B) the quantity of carbon sequestered in soils, forests, and trees.

"(2) Eligible recipients.—The Secretary shall award a grant under paragraph (1), on a competitive basis, to a college or university, or other research institution, that seeks to demonstrate the viability of a methodology described in paragraph (1).

"(d) Dissemination of Information.—As soon as practicable after the date of enactment of this section, the Secretary shall establish an Internet site through which agricultural producers may obtain information concerning—

"(1) potential public-private partnerships for measurement and monitoring of greenhouse gas fluxes; and

"(2) activities of the Secretary under this section.

"(e) Authorization of Appropriations.—There is authorized to be appropriated to carry out this section $20,000,000 for each of fiscal years 2002 through 2006.".

SEC. 906. SENSE OF CONGRESS CONCERNING NATIONAL RENEWABLE FUELS STANDARD.

It is the sense of Congress that—

(1) Congress supports and encourages adoption of a national renewable fuels program, under which the motor vehicle fuel placed into commerce by a refiner, blender, or importer shall be composed of renewable fuel measured according to a statutory formula for specified calendar years; and

(2) the Secretary of Agriculture should ensure that the policies and programs of the Department of Agriculture promote the production of fuels from renewable fuel sources.

SEC. 907. SENSE OF CONGRESS CONCERNING THE BIOENERGY PROGRAM OF THE DEPARTMENT OF AGRICULTURE.

(1) AGRICULTURAL ACT OF 1949.—The term "Agricultural Act of 1949" means the Agricultural Act of 1949 (7 U.S.C. 1421 et seq.), as in effect prior to the suspensions under section 171 of the Federal Agriculture Improvement and Reform Act of 1996 (7 U.S.C. 7301).

(2) BASE ACRES.—The term "base acres", with respect to a covered commodity on a farm, means the number of acres established under section 103 with respect to the commodity upon the election made by the producers on the farm under subsection (a) of such section.

(3) COUNTER-CYCLICAL PAYMENT.—The term "counter-cyclical payment" means a payment made to producers under section 105.

(4) COVERED COMMODITY.—The term "covered commodity" means wheat, corn, grain sorghum, barley, oats, upland cotton, rice, soybeans, and other oilseeds.

(5) EFFECTIVE PRICE.—The term "effective price", with respect to a covered commodity for a crop year, means the price calculated by the Secretary under section 105 to determine whether counter-cyclical payments are required to be made for that crop year.

(6) ELIGIBLE PRODUCER.—The term "eligible producer" means a producer described in section 101(a).

(7) FIXED, DECOUPLED PAYMENT.—The term "fixed, decoupled payment" means a payment made to producers under section 104.

Subtitle A—Fixed Decoupled Payments and Counter-Cyclical Payments

SEC. 101. PAYMENTS TO ELIGIBLE PRODUCERS.

(a) Payments Required.—Beginning with the 2002 crop of covered commodities, the Secretary shall make fixed decoupled payments and counter-cyclical payments under this subtitle—

(1) to producers on a farm that were parties to a production flexibility contract under section 111 of the Federal Agriculture Improvement and Reform Act of 1996 (7 U.S.C. 7211) for fiscal year 2002; and

(2) to other producers on farms in the United States as described in section 103(a).

(b) Tenants and Sharecroppers.—In carrying out this title, the Secretary shall provide adequate safeguards to protect the interests of tenants and sharecroppers.

(c) Sharing of Payments.—The Secretary shall provide for the sharing of fixed, decoupled payments and counter-cyclical payments among the eligible producers on a farm on a fair and equitable basis.

SEC. 102. ESTABLISHMENT OF PAYMENT YIELD.

(a) Establishment and Purpose.—For the purpose of making fixed decoupled payments and counter-cyclical payments under this subtitle, the Secretary shall provide for the establishment of a payment yield for each farm for each covered commodity in accordance with this section.

(b) Use of Farm Program Payment Yield.—Except as otherwise provided in this section, the payment yield for each of the 2002 through 2011 crops of a covered commodity for a farm shall be the farm program payment yield in effect for the 2002 crop of the covered commodity under section 505 of the Agricultural Act of 1949 (7 U.S.C. 1465).

(c) Farms Without Farm Program Payment Yield.—In the case of a farm for which a farm program payment yield is unavailable for a covered commodity (other than soybeans or other oilseeds), the Secretary shall establish an appropriate payment yield for the covered commodity on the farm taking in consideration the farm program payment yields applicable to the commodity under subsection (b) for similar farms in the area.

(d) Payment Yields for Oilseeds.—

(1) Determination of average yield.—In the case of soybeans and each other oilseed, the Secretary shall determine the average yield for the oilseed on a farm for the 1998 through 2001 crop years, excluding any crop year in which the acreage planted to the oilseed was zero. If, for any of these four crop years in which the oilseed was planted, the farm would have satisfied the eligibility criteria established to carry out section 1102 of the Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 1999 (Public Law 105–277; 7 U.S.C. 1421 note), the Secretary shall assign a yield for that year equal to 65 percent of the county yield.

(2) Adjustment for payment yield.—The payment yield for a farm for an oilseed shall be equal to the product of the following:

(A) The average yield for the oilseed determined under paragraph (1).

(B) The ratio resulting from dividing the national average yield for the oilseed for the 1981 through 1985 crops by the national average yield for the oilseed for the 1998 through 2001 crops.

SEC. 103. ESTABLISHMENT OF BASE ACRES AND PAYMENT ACRES FOR A FARM.

(a) Election by Producers of Base Acre Calculation Method.—For the purpose of making fixed decoupled payments and counter-cyclical payments with respect to a farm, the Secretary shall give producers on the farm an opportunity to elect one of the following as the method by which the base acres of all covered commodities on the farm are to be determined:

(1) The four-year average of acreage actually planted on the farm to a covered commodity for harvest, grazing, haying, silage, or other similar purposes during crop years 1998, 1999, 2000, and 2001 and any acreage on the farm that the producers were prevented from planting during such crop years to the covered commodity because of drought, flood, or other natural disaster, or other condition beyond the control of the producer, as determined by the Secretary.

(2) The sum of contract acreage (as defined in section 102 of the Federal Agriculture Improvement and Reform Act of 1996 (7 U.S.C. 7202)) used by the Secretary to calculate the fiscal year 2002 payment that, subject to section 109, would be made under section 114 of such Act (7 U.S.C. 7214) for the covered commodity on the farm and the four-year average determined under paragraph (1) for soybeans and each other oilseed produced on the farm.

(b) Single Election; Time for Election.—The opportunity to make the election described in subsection (a) shall be available to producers on a farm only once. The producers shall notify the Secretary of the election made by the producers under such subsection not later than 180 days after the date of the enactment of this Act.

(c) Effect of Failure To Make Election.—If the producers on a farm fail to make the election under subsection (a), or fail to timely notify the Secretary of the selected option as required by subsection (b), the producers shall be deemed to have made the election described in subsection (a)(2) to determine base acres for all covered commodities on the farm.

(d) Application of Election to All Covered Commodities.—The election made under subsection (a) or deemed to be made under subsection (c) with respect to a farm shall apply to all of the covered commodities on the farm. Producers may not make the election described in subsection (a)(1) for one covered commodity and the election described in subsection (a)(2) for other covered commodities on the farm.

(e) Treatment of Conservation Reserve Contract Acreage.—

(B) Cropland is released from coverage under a conservation reserve contract by the Secretary.

(2) Special payment rules.—For the fiscal year and crop year in which a base acre adjustment under paragraph (1) is first made, the producers on the farm shall elect to receive either fixed decoupled payments and counter-cyclical payments with respect to the acreage added to the farm under this subsection or a prorated payment under the conservation reserve contract, but not both.

(f) Payment Acres.—The payment acres for a covered commodity on a farm shall be equal to 85 percent of the base acres for the commodity.

(g) Prevention of Excess Base Acres.—

(1) Required reduction.—If the sum of the base acres for a farm, together with the acreage described in paragraph (2), exceeds the actual cropland acreage of the farm, the Secretary shall reduce the quantity of base acres for one or more covered commodities for the farm or peanut acres for the farm as necessary so that the sum of the base acres and acreage described in paragraph (2) does not exceed the actual cropland acreage of the farm. The Secretary shall give the producers on the farm the opportunity to select the base acres or peanut acres against which the reduction will be made.

(2) Other acreage.—For purposes of paragraph (1), the Secretary shall include the following:

(A) Any peanut acres for the farm under chapter 3 of subtitle C.

(B) Any acreage on the farm enrolled in the conservation reserve program or wetlands reserve program under chapter 1 of subtitle D of title XII of the Food Security Act of 1985 (16 U.S.C. 3830 et seq.).

(C) Any other acreage on the farm enrolled in a conservation program for which payments are made in exchange for not producing an agricultural commodity on the acreage.

(3) Exception for double-cropped acreage.—In applying paragraph (1), the Secretary shall,make an exception in the case of double cropping, as determined by the Secretary.

(2) The payment acres of the covered commodity on the farm.

(3) The payment yield for the covered commodity for the farm.

(d) Time for Payment.—

(1) General rule.—Fixed, decoupled payments shall be paid not later than September 30 of each of fiscal years 2002 through 2011. In the case of the 2002 crop, payments may begin to be made on or after December 1, 2001.

(2) Advance payments.—At the option of an eligible producer, 50 percent of the fixed, decoupled payment for a fiscal year shall be paid on a date selected by the producer. The selected date shall be on or after December 1

of that fiscal year, and the producer may change the selected date for a subsequent fiscal year by providing advance notice to the Secretary.

(3) Repayment of advance payments.—If a producer that receives an advance fixed, decoupled payment for a fiscal year ceases to be an eligible producer before the date the fixed, decoupled payment would otherwise have been made by the Secretary under paragraph (1), the producer shall be responsible for repaying the Secretary the full amount of the advance payment.

SEC. 105. AVAILABILITY OF COUNTER-CYCLICAL PAYMENTS.

(a) Payment Required.—The Secretary shall make counter-cyclical payments with respect to a covered commodity whenever the Secretary determines that the effective price for the commodity is less than the target price for the commodity.

(b) Effective Price.—For purposes of subsection (a), the effective price for a covered commodity is equal to the sum of the following:

(1) The higher of the following:

(A) The national average market price received by producers during the 12-month marketing year for the commodity, as determined by the Secretary.

(B) The national average loan rate for a marketing assistance loan for the covered commodity in effect for the same period under subtitle B.

(d) Payment Rate.—The payment rate used to make counter-cyclical payments with respect to a covered commodity for a crop year shall be equal to the difference between—

(1) the target price for the commodity; and

(2) the effective price determined under subsection (b) for the commodity.

(e) Payment Amount.—The amount of the counter-cyclical payment to be paid to the eligible producers on a farm for a covered commodity for a crop year shall be equal to the product of the following:

(1) The payment rate specified in subsection (d).

(2) The payment acres of the covered commodity on the farm.

(3) The payment yield for the covered commodity for the farm.

(f) Time for Payments.—

(2) Partial payment.—The Secretary may permit, and, if so permitted, an eligible producer may elect to receive, up to 40 percent of the projected counter-cyclical payment, as determined by the Secretary, to be made under this section for a crop of a covered commodity upon completion of the first six months of the marketing year for that crop. The producer shall repay to the Secretary the amount, if any, by which the partial payment exceeds the actual counter-cyclical payment to be made for that marketing year.

(g) Special Rule for Currently Undesignated Oilseed.—If the Secretary uses the authority under section 100(8) to designate another oilseed as an oilseed for which counter-cyclical payments may be made, the Secretary may modify the target price specified in subsection (c)(9) that would otherwise apply to that oilseed as the Secretary considers appropriate.

(h) Special Rule for Barley Used Only for Feed Purposes.—For purposes of calculating the effective price for barley under subsection (b), the Secretary shall use the loan rate in effect for barley under section 122(b)(3), except, in the case of producers who received the higher loan rate provided under such section for barley used only for feed purposes, the Secretary shall use that higher loan rate.

SEC. 106. PRODUCER AGREEMENT REQUIRED AS CONDITION ON PROVISION OF FIXED, DECOUPLED PAYMENTS AND COUNTER-CYCLICAL PAYMENTS.

(a) Compliance With Certain Requirements.—

(1) Requirements.—Before the producers on a farm may receive fixed, decoupled payments or counter-cyclical payments with respect to the farm, the producers shall agree, in exchange for the payments—

(A) to comply with applicable conservation requirements under subtitle B of title XII of the Food Security Act of 1985 (16 U.S.C. 3811 et seq.);

(2) Compliance.—The Secretary may issue such rules as the Secretary considers necessary to ensure producer compliance with the requirements of paragraph (1).

(b) Effect of Foreclosure.—A producer may not be required to make repayments to the Secretary of fixed, decoupled payments and counter-cyclical payments if the farm has been foreclosed on and the Secretary determines that forgiving the repayments is appropriate to provide fair and equitable treatment. This subsection shall not void the responsibilities of the producer under subsection (a) if the producer continues or resumes operation, or control, of the farm. On the resumption of operation or control over the farm by the producer, the requirements of subsection (a) in effect on the date of the foreclosure shall apply.

(c) Transfer or Change of Interest in Farm.—

(1) Termination.—Except as provided in paragraph (4), a transfer of (or change in) the interest of a producer in base acres for which fixed, decoupled payments or counter-cyclical payments are made shall result in the termination of the payments with respect to the base acres, unless the transferee or owner of the acreage agrees to assume all obligations under subsection (a). The termination shall be effective on the date of the transfer or change.

(2) Transfer of payment base.—There is no restriction on the transfer of a farm's base acres or payment yield as part of a change in the producers on the farm.

(3) Modification.—At the request of the transferee or owner, the Secretary may modify the requirements of subsection (a) if the modifications are consistent with the objectives of such subsection, as determined by the Secretary.

(4) Exception.—If a producer entitled to a fixed, decoupled payment or counter-cyclical payment dies, becomes incompetent, or is otherwise unable to receive the payment, the Secretary shall make the payment, in accordance with regulations prescribed by the Secretary.

If, for any of these four crop years in which peanuts were planted on a farm by the producer, the farm would have satisfied the eligibility criteria established to carry out section 1102 of the Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 1999 (7 U.S.C. 1421 note; Public Law 105–277), the Secretary shall assign a yield for the producer for that year equal to 65 percent of the county yield, as determined by the Secretary.

(B) Selection by producer.—If a county in which a historical peanut producer described in subparagraph (A) is located is declared a disaster area during 1 or more of the 4 crop years described in subparagraph (A), for the purposes of determining the 4-year average yield for the historical peanut producer, the historical peanut producer may elect to substitute, for not more than 1 of the crop years during which a disaster is declared—

(i) the State 4-year average yield of peanuts produced in the State; or

(ii) the average yield for the historical peanut producer determined by the Secretary under subparagraph (A).

(2) Acreage average.—Except as provided in paragraph (3), the Secretary shall determine, for the historical peanut producer, the 4-year average of—

(B) Factors.—In making the determinations, the Secretary shall take into account changes in the number and identity of historical peanut producers sharing in the risk of producing a peanut crop since the 1998 crop year, including providing a method for the assignment of average acres and average yield to a farm when a historical peanut producer is no longer living or an entity composed of historical peanut producers has been dissolved.

(b) Assignment of Yield and Acres to Farms.—

(1) Assignment by historical peanut producers.—For each of the 2002 and 2003 crop years, the Secretary shall provide each historical peanut producer with an opportunity to assign the average peanut yield and average acreage determined under subsection (a) for the historical peanut producer to cropland on a farm.

However, it shall play no role in the assembly of programs administered by other federal agencies into Farmland Stewardship Agreements.

“(e) State Level Administration.—The state departments of agriculture shall have primary responsibility for operating the Farmland Stewardship Program. A state department of agriculture may choose to operate the program on its own, may collaborate with another local, state or federal agency, conservation district or tribe in operating the program, or may delegate responsibility to another state agency, such as the state department of natural resources or the state conservation district agency. The state department of agriculture or designated state agency shall consult with the agencies with management authority and responsibility for the resources affected on properties on which Farmland Stewardship Agreements are negotiated and assembled.

“(1) A state department of agriculture shall submit an application to the Secretary requesting designation as the ‘designated state agency’ to operate the Farmland Stewardship Program. If the state department of agriculture chooses to delegate responsibility to another state agency, the department of agriculture shall ask the governor to designate another agency for this purpose and that agency shall submit application to the Secretary.

“(2) The Secretary shall approve the request for designation as the ‘designated state agency’ if the agency demonstrates that it has the capability to implement the Farmland Stewardship Program and attests that it shall conform with the confidentiality requirements in Sec. 1238B(g). Upon approval of the request, the Secretary shall enter into a memorandum of understanding with the designated state agency specifying the state's responsibilities in carrying out the program and the amount of technical assistance funds that shall be provided to the state on an annual basis to operate the program, in accordance with paragraphs (1)(C), (1)(E) and (1)(F) of subsection (g).

“(f) Annual Reports.—The designated state agency shall annually submit to the Secretary and make publicly available a report that describes—

“(1) The progress achieved, the funds expended, the purposes for which funds were expended and monitoring and evaluating results obtained by local contracting agencies, and

“(2) The plans and objectives of the State for future activities under the program.

“(g) Technical Assistance.—

“(1) Of the funds used from other programs and of funds made available to carry out the Farmland Stewardship Program for a fiscal year, the Secretary shall reserve not more than twenty-five percent for the provision of technical assistance under the Program. Of the funds made available—

“(A) not more than 1.5% shall be reserved for administration, coordination and oversight through the Natural Resources Conservation Service headquarters office;

“(B) not more than 1.5% shall be reserved for the Farmland Stewardship Council to carry out its duties in cooperation with the State Technical Committees, as provided under section 1238E;

“(C) not more than 2.0% shall be reserved for administration and coordination through the designated state agency in the state where the property is located;

“(D) not more than 1.0% shall be reserved for administration and coordination through the Natural Resources Conservation Service state office, in the state where property is located;

“(E) not more than 1.0% shall be reserved for administration and coordination through the state conservation district agency, unless such agency is the designated state agency for administering this program, in which case these funds shall be added to the funds in the next paragraph; and

“(F) not less than 18% shall be reserved for local technical assistance, carried out through a designated ‘contracting agency’ and subcontractors chosen by and working with the contracting agency for preparing and executing agreements and monitoring, evaluating and administering agreements for their full term.

“(2) An owner or operator who is receiving a benefit under this chapter shall be eligible to receive technical assistance in accordance with section 1243(d) to assist the owner or operator in carrying out a contract entered into under this chapter.

“(h) Ensuring Availability of Funds.—All amounts required for preparing, executing, carrying out, monitoring, evaluating and administering an agreement for its entire term shall be made available by the Federal, State, and local agencies and private sector entities involved in funding the agreement upon execution of the agreement.

“SEC. 1238B. USE OF FARMLAND STEWARDSHIP AGREEMENTS.

“(a) Agreements Authorized.—The Secretary shall carry out the Farmland Stewardship Program by entering into service contracts as determined by the Secretary, to be known as farmland stewardship agreements, with the owners or operators of eligible agricultural land to maintain and protect the natural and agricultural resources on the land.

“(b) Legal Basis.—An agreement shall operate in all respects as a service contract and, as such, provides the Secretary with the opportunity to hire the owner or operator of eligible agricultural land as a vendor to perform one or more specific services for an equitable fee for each service rendered. Any agency participating in the Farmland Stewardship Program that has the authority to enter into service contracts and to expend public funds under such contracts may enter into or participate in the funding of an agreement.

“(c) Basic Purposes.—An agreement with the owner or operator of eligible agricultural land shall be used—

“(1) to negotiate a mutually agreeable set of guidelines, practices, and procedures under which conservation practices will be provided by the owner or operator to protect, maintain, and, where possible, improve, the natural resources on the land covered by the agreement in return for annual payments to the owner or operator;

“(2) to enable an owner or operator to participate in one or more of the conservation programs offered through agencies at all levels of government and the private sector and, where possible and feasible, comply with permit requirements and regulations, through a one-stop, one-application process.

“(3) to implement a conservation program or series of programs where there is no such program or to implement conservation management activities where there is no such activity;

“(4) to expand or maintain conservation practices and resource management activities to a property where it is not possible at the present time to negotiate or reach agreement on a public purchase of a fee-simple or less-than-fee interest in the property for conservation purposes; and

“(5) to negotiate and develop agreements with private owners and operators to expand or maintain their participation in conservation activities and programs; to enable them to install or maintain best management practices (BMPs) and other recommended practices to improve the compatibility of agriculture, horticulture, silviculture, aquaculture and equine activities with the environment; and improve compliance with public health, safety and environmental regulations.

“(d) Modification of Other Conservation Program Elements.—If most, but not all, of the limitations, conditions, policies and requirements of a conservation program that is implemented in whole, or in part, through the Farmland Stewardship Program are met with respect to a parcel of eligible agricultural land, and the purposes to be achieved by the agreement to be entered into for such land are consistent with the purposes of the conservation program, then the Secretary may waive any remaining limitations, conditions, policies or requirements of the conservation program that would otherwise prohibit or limit the agreement. The Secretary may also grant requests to—

“(1) establish different or automatic enrollment criteria than otherwise established by regulation or policy;

“(2) establish different compensation rates to the extent the parties to the agreement consider justified;

“(3) establish different conservation practice criteria if doing so will achieve greater conservation benefits;

“(4) provide more streamlined and integrated paperwork requirements;

“(5) provide for the transfer of conservation program funds to states with flexible incentives accounts; and

“(6) provide funds for an adaptive management process to monitor the effectiveness of the Program for wildlife, the protection of natural resources, economic effectiveness and sustaining the agricultural economy.

“(7) For a waiver or exception to be considered, a contracting agency or the designated state agency must—

“(A) Submit a request for a waiver to the Secretary or Administrator who has responsibility for the program for which a waiver or exception is being requested. Requests for waivers or exceptions in programs administered by the United States Department of Agriculture shall be submitted to the Secretary of Agriculture, while requests for waivers or exceptions in programs administered by the United States Department of Interior shall be submitted to the Secretary of Interior and requests for waivers or exceptions in programs administered by the United States Environmental Protection Agency shall be submitted to the Administrator of that Agency, and so forth.

“(B) The request shall—

“(i) explain why the property qualifies for participation in the program;

“(ii) explain why it is necessary or desirable to make an exception to or waive one or more program limitations, conditions, policies or requirements;

“(iii) if possible, suggest alternative methods or approaches to satisfying these limitations, conditions, policies or requirements that are appropriate for the property in question;

“(iv) request that the Secretary or Administrator grant the exception or waiver, based on the documentation submitted.

“(C) The Secretary or Administrator may request additional documentation, or may suggest alternative methods of overcoming program limitations or obstacles on the property in question, prior to deciding whether or not to grant a request for an exception or waiver.

“(D) Waivers and exceptions may be granted by a Secretary or Administrator to allow additional flexibility in tailoring conservation programs to the specific needs, opportunities and challenges offered by individual parcels of land, and to remove administrative and regulatory obstacles that previously may have limited the use of these programs on eligible agricultural land, or would prevent these programs from being combined together through a Farmland Stewardship Agreement. Waivers and exceptions may be granted only if the purposes to be achieved by the program after the waiver or exception is granted remain consistent with the purposes for which the program was established.

“(E) The Secretaries and Administrators who receive requests for waivers or exceptions under this chapter shall respond to these requests within sixty (60) days of receipt. Decisions on whether to grant a request shall be rendered within one hundred eighty (180) days of receipt.

“(e) Provisional Contracts.—Provisional contracts shall be used to provide payments to private landowners or operators, and to the organization or agency that will oversee the agreement, while baseline data is gathered, documents are prepared and the formal agreement is being negotiated. Provisional contracts shall pay for all technical services required to establish an agreement. Provisional contracts may be used to establish a Farmland Stewardship Agreement, or any other type of conservation program, permit or agreement on private land. Provisional contracts shall be used during a two-year planning period, which may be extended for up to two additional periods of six months each by mutual agreement between the Secretary, the contracting agency and the owner or operator.

“(f) Payments.—Payments to owners and operators shall be made as provided in the programs that are combined as part of a Farmland Stewardship Agreement. At the election of the owner or operator, payments may be collected and combined together by the designated state agency and issued to the owner or operator in equal annual payments over the term of the agreement. Payments for other services rendered by the owner or operator shall be made as follows—

“(1) In general.—Programs that contain term or permanent easements may be combined into a Farmland Stewardship Agreement. Except for portions of a property affected by easements, Farmland Stewardship Agreements shall provide no interest in property and shall be solely contracts for specific services. The fees paid shall be based on the services provided. Compensation shall include—

“(A) Annual base payment.—All owners or operators enrolled in a Farmland Stewardship Agreement shall receive an annual base payment, at a rate to be determined by the Secretary. The annual base payment shall be considered by the Secretary to be satisfied if the owner or operator receives annual payments from another conservation program that has been incorporated into the Farmland Stewardship Agreement. In addition, owners and operators shall receive—

“(B) Direct fees for services.—These fees shall be based on the cost of providing each service. These fees may be set by adopting private sector market prices for the performance of similar services or by competitive bidding. Or, alternatively—

“(C) Annual per-acre stewardship fees.—These fees shall be based on the services provided, or the quantity of benefits provided, with higher fees for greater benefits that can be quantified. Such values shall be determined and set by the Secretary. Or, alternatively—

“(D) Other incentives.—Other forms of compensation acceptable to an owner or operator also may be considered. These other forms of compensation may include federal, state or local tax waivers, credits, reductions or exclusions; priority processing of permits from state and local agencies; consolidation of permits from state and local agencies into a single operating plan; extended-duration permits from state and local agencies; enhanced eligibility and priority listing for participation in cost-share programs, loan programs, conservation programs and permanent conservation easement or public purchase programs; and priority access to technical assistance services provided by federal and, where possible, local, regional and state agencies.

“(g) Confidentiality of Data.—All information or data provided to, obtained by or developed by the Secretary, or any contractor to the Secretary or the designated state agency, for the purpose of providing technical or financial assistance to owners or operators in connection with the United States Department of Agriculture's conservation programs, or in connection with the Farmland Stewardship Program, shall be—

“(1) Kept confidential by all officers and employees of the Department and the designated state agency;

“(2) Not released, disclosed, made public or in any manner communicated to any agency, state or person outside the Department and the designated state agency; and

“(3) Not subject to any other law that would require the information or data to be released, disclosed, made public or in any way communicated to any agency, state or person outside the Department and designated state agency.

“(4) Any information or data related to an individual farm owner or operator may be reported only in an anonymous, aggregated form as currently provided under the Department's National Agricultural Statistic Services.

“(h) State and Local Conservation Priorities.—To the maximum extent practicable, agreements shall address the conservation priorities established by the State and locality in which the eligible agricultural land are located. The Secretary may adopt for this purpose a pre-existing state or regional conservation plan or strategy that maps economically and ecologically important land, including a plan developed pursuant to planning requirements under Title VIII of the 2001 Interior Appropriations Act and Title IX of the 2001 Commerce, Justice, State Appropriations Act.

“(i) Watershed Enhancement.—To the extent practicable, the Secretary shall encourage the development of Farmland Stewardship Program applications on a watershed basis.

“SEC. 1238C. PARTNERSHIP APPROACH TO PROGRAM.

SEC. 311. FARMERS FOR AFRICA AND CARIBBEAN BASIN PROGRAM.

(a) FINDINGS.—Congress finds the following:

(1) Many African farmers and farmers in Caribbean Basin countries use antiquated techniques to produce their crops, which result in poor crop quality and low crop yields.

(2) Many of these farmers are losing business to farmers in European and Asian countries who use advanced planting and production techniques and are supplying agricultural produce to restaurants, resorts, tourists, grocery stores, and other consumers in Africa and Caribbean Basin countries.

(3) A need exists for the training of African farmers and farmers in Caribbean Basin countries and other developing countries in farming techniques that are appropriate for the majority of eligible farmers in African or Caribbean countries, including standard growing practices, insecticide and sanitation procedures, and other farming methods that will produce increased yields of more nutritious and healthful crops.

(4) African-American and other American farmers, as well as banking and insurance professionals, are a ready source of agribusiness expertise that would be invaluable for African farmers and farmers in Caribbean Basin countries.

(5) A United States commitment is appropriate to support the development of a comprehensive agricultural skills training program for these farmers that focuses on—

(A) improving knowledge of insecticide and sanitation procedures to prevent crop destruction;

(B) teaching modern farming techniques, including the identification and development of standard growing practices and the establishment of systems for recordkeeping, that would facilitate a continual analysis of crop production;

(C) the use and maintenance of farming equipment that is appropriate for the majority of eligible farmers in African or Caribbean Basin countries;

(D) expansion of small farming operations into agribusiness enterprises through the development and use of village banking systems and the use of agricultural risk insurance pilot products, resulting in increased access to credit for these farmers; and

(E) marketing crop yields to prospective purchasers (businesses and individuals) for local needs and export.

(6) The participation of African-American and other American farmers and American agricultural farming specialists in such a training program promises the added benefit of improving access to African and Caribbean Basin markets for American farmers and United States farm equipment and products and business linkages for United States insurance providers offering technical assistance on, among other things, agricultural risk insurance products.

(7) Existing programs that promote the exchange of agricultural knowledge and expertise through the exchange of American and foreign farmers have been effective in promoting improved agricultural techniques and food security, and, thus, the extension of additional resources to such farmer-to- farmer exchanges is warranted.

(b) DEFINITIONS.—In this section:

(1) AGRICULTURAL FARMING SPECIALIST.—The term "agricultural farming specialist" means an individual trained to transfer information and technical support relating to agribusiness, food security, the mitigation and alleviation of hunger, the mitigation of agricultural and farm risk, maximization of crop yields, agricultural trade, and other needs specific to a geographical location as determined by the President.

(e) TERMS OF PROGRAM.—(1) It is the goal of the Program that at least 1,000 farmers participate in the training program by December 31, 2005, of which 80 percent of the total number of participating farmers will be African farmers or farmers in Caribbean Basin countries and 20 percent of the total number of participating farmers will be American farmers.

(2) Training under the Program will be provided to eligible farmers in groups to ensure that information is shared and passed on to other eligible farmers. Eligible farmers will be trained to be specialists in their home communities and will be encouraged not to retain enhanced farming technology for their own personal enrichment.

(3) Through partnerships with American businesses, the Program will utilize the commercial industrial capability of businesses dealing in agriculture to train eligible farmers on farming equipment that is appropriate for the majority of eligible farmers in African or Caribbean Basin countries and to introduce eligible farmers to the use of insurance as a risk management tool.

(f) SELECTION OF PARTICIPANTS.—(1) The selection of eligible farmers, as well as African-American and other American farmers and agricultural farming specialists, to participate in the Program shall be made by grant recipients using an application process approved by the President.

(2) Participating farmers must have sufficient farm or agribusiness experience and have obtained certain targets regarding the productivity of their farm or agribusiness.

TITLE VIII—FORESTRY INITIATIVES

SEC. 801. REPEAL OF FORESTRY INCENTIVES PROGRAM AND STEWARDSHIP INCENTIVE PROGRAM.

The Cooperative Forestry Assistance Act of 1978 is amended by striking section 4 (16 U.S.C. 2103) and section 6 (16 U.S.C. 2103b).

SEC. 802. ESTABLISHMENT OF FOREST LAND ENHANCEMENT PROGRAM.

(a) FINDINGS.—Congress finds the following:

(1) There is a growing dependence on private nonindustrial forest lands to supply the necessary market commodities and nonmarket values, such as habitat for fish and wildlife, aesthetics, outdoor recreation opportunities, and other forest resources, required by a growing population.

(2) There is a strong demand for expanded assistance programs for owners of nonindustrial private forest land since the majority of the wood supply of the United States comes from nonindustrial private forest land.

(3) The soil, carbon stores, water and air quality of the United States can be maintained and improved through good stewardship of nonindustrial private forest lands.

(4) The products and services resulting from stewardship of nonindustrial private forest lands provide income and employment that contribute to the economic health and diversity of rural communities.

(5) Wildfires threaten human lives, property, forests, and other resources, and Federal and State cooperation in forest fire prevention and control has proven effective and valuable, in that properly managed forest stands are less susceptible to catastrophic fire, as dramatized by the catastrophic fire seasons of 1998 and 2000.

(6) Owners of private nonindustrial forest lands are being faced with increased pressure to convert their forestland to development and other uses.

(7) Complex, long-rotation forest investments, including sustainable hardwood management, are often the most difficult commitment for small, nonindustrial private forest landowners and, thus, should receive equal consideration under cost-share programs.

(8) The investment of one Federal dollar in State and private forestry programs is estimated to leverage $9 on average from State, local, and private sources.

(b) PURPOSE.—It is the purpose of this section to strengthen the commitment of the Department of Agriculture to sustainable forestry and to establish a coordinated and cooperative Federal, State, and local sustainable forest program for the establishment, management, maintenance, enhancement, and restoration of forests on nonindustrial private forest lands in the United States.

(c) FOREST LAND ENHANCEMENT PROGRAM.—The Cooperative Forestry Assistance Act of 1978 is amended by inserting after section 3 (16 U.S.C. 2102) the following new section 4:

"SEC. 4. FOREST LAND ENHANCEMENT PROGRAM.

``(a) ESTABLISHMENT.—

``(1) ESTABLISHMENT; PURPOSE.—The Secretary shall establish a Forest Land Enhancement Program (in this section referred to as the 'Program') for the purpose of providing financial, technical, educational, and related assistance to State foresters to encourage the long-term sustainability of nonindustrial private forest lands in the United States by assisting the owners of such lands in more actively managing their forest and related resources by utilizing existing State, Federal, and private sector resource management expertise, financial assistance, and educational programs.

``(2) ADMINISTRATION.—The Secretary shall carry out the Program within, and administer the Program through, the Natural Resources Conservation Service.

``(3) COORDINATION.—The Secretary shall implement the Program in coordination with State foresters.

``(b) PROGRAM OBJECTIVES.—In implementing the Program, the Secretary shall target resources to achieve the following objectives:

``(1) Investment in practices to establish, restore, protect, manage, maintain, and enhance the health and productivity of the nonindustrial private forest lands in the United States for timber, habitat for flora and fauna, water quality, and wetlands.

``(2) Ensuring that afforestation, reforestation, improvement of poorly stocked stands, timber stand improvement, practices necessary to improve seedling growth and survival, and growth enhancement practices occur where needed to enhance and sustain the long-term productivity of timber and nontimber forest resources to help meet future public demand for all forest resources and provide environmental benefits.

``(3) Reduce the risks and help restore, recover, and mitigate the damage to forests caused by fire, insects, invasive species, disease, and damaging weather.

``(4) Increase and enhance carbon sequestration opportunities.

``(5) Enhance implementation of agroforestry practices.

``(6) Maintain and enhance the forest landbase and leverage State and local financial and technical assistance to owners that promote the same conservation and environmental values.

``(c) ELIGIBILITY.—

``(1) IN GENERAL.—An owner of nonindustrial private forest land is eligible for cost-sharing assistance under the Program if the owner—

``(A) agrees to develop and implement an individual stewardship, forest, or stand management plan addressing site specific activities and practices in cooperation with, and approved by, the State forester, state official, or private sector program in consultation with the State forester;

``(B) agrees to implement approved activities in accordance with the plan for a period of not less than 10 years, unless the State forester approves a modification to such plan; and

``(C) meets the acreage restrictions as determined by the State forester in conjunction with the State Forest Stewardship Coordinating Committee established under section 19.

``(2) STATE PRIORITIES.—The Secretary, in consultation with the State forester and the State Forest Stewardship Coordinating Committee may develop State priorities for cost sharing under the Program that will promote forest management objectives in that State.

``(3) DEVELOPMENT OF PLAN.—An owner shall be eligible for cost-share assistance for the development of the individual stewardship, forest, or stand management plan required by paragraph (1).

``(d) APPROVED ACTIVITIES.—

``(1) DEVELOPMENT.—The Secretary, in consultation with the State forester and the State Forest Stewardship Coordinating Committee, shall develop a list of approved forest activities and practices that will be eligible for cost-share assistance under the Program within each State.

"(2) TYPE OF ACTIVITIES.—In developing a list of approved activities and practices under paragraph (1), the Secretary shall attempt to achieve the establishment, restoration, management, maintenance, and enhancement of forests and trees for the following:

"(A) The sustainable growth and management of forests for timber production.

"(B) The restoration, use, and enhancement of forest wetlands and riparian areas.

"(C) The protection of water quality and watersheds through the application of State-developed forestry best management practices.

"(D) Energy conservation and carbon sequestration purposes.

"(E) Habitat for flora and fauna.

"(F) The control, detection, and monitoring of invasive species on forestlands as well as preventing the spread and providing for the restoration of lands affected by invasive species.

"(G) Hazardous fuels reduction and other management activities that reduce the risks and help restore, recover, and mitigate the damage to forests caused by fire.

"(H) The development of forest or stand management plans.

"(I) Other activities approved by the Secretary, in coordination with the State forester and the State Forest Stewardship Coordinating Committee.

"(e) COOPERATION.—In implementing the Program, the Secretary shall cooperate with other Federal, State, and local natural resource management agencies, institutions of higher education, and the private sector.

"(f) REIMBURSEMENT OF ELIGIBLE ACTIVITIES.—

"(1) IN GENERAL.—The Secretary shall share the cost of implementing the approved activities that the Secretary determines are appropriate, in the case of an owner that has entered into an agreement to place nonindustrial private forest lands of the owner in the Program.

"(2) RATE.—The Secretary shall determine the appropriate reimbursement rate for cost-share payments under paragraph (1) and the schedule for making such payments.

"(3) MAXIMUM.—The Secretary shall not make cost-share payments under this subsection to an owner in an amount in excess of 75 percent of the total cost, or a lower percentage as determined by the State forester, to such owner for implementing the practices under an approved plan. The maximum payments to any one owner shall be determined by the Secretary.

"(4) CONSULTATION.—The Secretary shall make determinations under this subsection in consultation with the State forester.

"(g) RECAPTURE.—

"(1) IN GENERAL.—The Secretary shall establish and implement a mechanism to recapture payments made to an owner in the event that the owner fails to implement any approved activity specified in the individual stewardship, forest, or stand management plan for which such owner received cost-share payments.

"(2) ADDITIONAL REMEDY.—The remedy provided in paragraph (1) is in addition to any other remedy available to the Secretary.

"(h) DISTRIBUTION.—The Secretary shall distribute funds available for cost sharing under the Program among the States only after giving appropriate consideration to—

"(1) the total acreage of nonindustrial private forest land in each State;

"(2) the potential productivity of such land;

"(3) the number of owners eligible for cost sharing in each State;

"(4) the opportunities to enhance non-timber resources on such forest lands;

"(5) the anticipated demand for timber and nontimber resources in each State;

"(6) the need to improve forest health to minimize the damaging effects of catastrophic fire, insects, disease, or weather; and

"(7) the need and demand for agroforestry practices in each State.

"(i) DEFINITIONS.—In this section:

"(1) NONINDUSTRIAL PRIVATE FOREST LANDS.—The term 'nonindustrial private forest lands' means rural lands, as determined by the Secretary, that—

"(A) have existing tree cover or are suitable for growing trees; and

"(B) are owned or controlled by any nonindustrial private individual, group, association, corporation, Indian tribe, or other private legal entity (other than a nonprofit private legal entity) so long as the individual, group, association, corporation, tribe, or entity has definitive decision-making authority over the lands, including through long-term leases and other land tenure systems, for a period of time long enough to ensure compliance with the Program.

"(2) OWNER.—The term 'owner' includes a private individual, group, association, corporation, Indian tribe, or other private legal entity (other than a nonprofit private legal entity) that has definitive decision-making authority over nonindustrial private forest lands through a long-term lease or other land tenure systems.

"(3) SECRETARY.—The term 'Secretary' means the Secretary of Agriculture.

"(4) STATE FORESTER.—The term 'State forester' means the director or other head of a State Forestry Agency or equivalent State official.

"(j) AVAILABILITY OF FUNDS.—The Secretary shall use $200,000,000 of funds of the Commodity Credit Corporation to carry out the Program during the period beginning on October 1, 2001, and ending on September 30, 2011.".

(d) CONFORMING AMENDMENT.—Section 246(b)(2) of the Department of Agriculture Reorganization Act of 1994 (7 U.S.C. 6962(b)(2)) is amended by striking "forestry incentive program" and inserting "Forest Land Enhancement Program".

"(1) The value and benefits of practicing sustainable forestry.

"(2) The importance of professional forestry advice in achieving their sustainable forestry objectives.

"(3) The variety of public and private sector resources available to assist them in planning for and practicing sustainable forestry.".

SEC. 804. ENHANCED COMMUNITY FIRE PROTECTION.

(a) FINDINGS.—Congress finds the following:

(1) The severity and intensity of wildland fires has increased dramatically over the past few decades as a result of past fire and land management policies.

(2) The record 2000 fire season is a prime example of what can be expected if action is not taken.

(3) These wildfires threaten not only the nation's forested resources, but the thousands of communities intermingled with the wildlands in the wildland-urban interface.

(4) The National Fire Plan developed in response to the 2000 fire season is the proper, coordinated, and most effective means to address this wildfire issue.

(5) Whereas adequate authorities exist to tackle the wildfire issues at the landscape level on Federal lands, there is limited authority to take action on most private lands where the largest threat to life and property lies.

(6) There is a significant Federal interest in enhancing community protection from wildfire.

(b) ENHANCED PROTECTION.—The Cooperative Forestry Assistance Act of 1978 is amended by inserting after section 10 (16 U.S.C. 2106) the following new section:

"SEC. 10A. ENHANCED COMMUNITY FIRE PROTECTION.

"(a) COOPERATIVE MANAGEMENT RELATED TO WILDFIRE THREATS.—The Secretary may cooperate with State foresters and equivalent State officials in the management of lands in the United States for the following purposes:

"(1) Aid in wildfire prevention and control.

"(2) Protect communities from wildfire threats.

"(3) Enhance the growth and maintenance of trees and forests that promote overall forest health.

"(4) Ensure the continued production of all forest resources, including timber, outdoor recreation opportunities, wildlife habitat, and clean water, through conservation of forest cover on watersheds, shelterbelts, and windbreaks.

"(b) COMMUNITY AND PRIVATE LAND FIRE ASSISTANCE PROGRAM.—

"(1) ESTABLISHMENT; PURPOSE.—The Secretary shall establish a Community and Private Land Fire Assistance program (in this section referred to as the 'Program')—

"(A) to focus the Federal role in promoting optimal firefighting efficiency at the Federal, State, and local levels;

"(B) to augment Federal projects that establish landscape level protection from wildfires;

"(C) to expand outreach and education programs to homeowners and communities about fire prevention; and

"(D) to establish defensible space around private landowners homes and property against wildfires.

"(2) ADMINISTRATION AND IMPLEMENTATION.—The Program shall be administered by the Forest Service and implemented through the State forester or equivalent State official.

"(3) COMPONENTS.—In coordination with existing authorities under this Act, the Secretary may undertake on both Federal and non-Federal lands—

"(A) fuel hazard mitigation and prevention;

"(B) invasive species management;

"(C) multi-resource wildfire planning;

"(D) community protection planning;

"(E) community and landowner education enterprises, including the program known as FIREWISE;

"(F) market development and expansion;

"(G) improved wood utilization;

"(H) special restoration projects.

"(c) Authorization of Appropriations.—There are hereby authorized to be appropriated to the Secretary $35,000,000 for each of fiscal years 2002 through 2011, and such sums as may be necessary thereafter, to carry out this section.".

SEC. 805. INTERNATIONAL FORESTRY PROGRAM.

Section 2405(d) of the Global Climate Change Prevention Act of 1990 (title XXIV of Public Law 101–624; 7 U.S.C. 6704(d)) is amended by striking "2002" and inserting "2011".

SEC. 806. WILDFIRE PREVENTION AND HAZARDOUS FUEL PURCHASE PROGRAM.

(a) Findings.—Congress finds that—

(1) the damage caused by wildfire disasters has been equivalent in magnitude to the damage resulting from the Northridge earthquake, Hurricane Andrew, and the recent flooding of the Mississippi River and the Red River;

(2) more than 20,000 communities in the United States are at risk from wildfire and approximately 11,000 of those communities are located near Federal land;

(3) the accumulation of heavy forest fuel loads continues to increase as a result of disease, insect infestations, and drought, further increasing the risk of fire each year;

(4) modification of forest fuel load conditions through the removal of hazardous fuels would—

(A) minimize catastrophic damage from wildfires;

(B) reduce the need for emergency funding to respond to wildfires; and

(C) protect lives, communities, watersheds, and wildlife habitat;

(5) the hazardous fuels removed from forest land represent an abundant renewable resource, as well as a significant supply of biomass for biomass-to-energy facilities;

(6) the United States should invest in technologies that promote economic and entrepreneurial opportunities in processing forest products removed through hazardous fuel reduction activities; and

(7) the United States should—

(A) develop and expand markets for traditionally underused wood and other biomass as a value-added outlet for excessive forest fuels; and

(B) commit resources to support planning, assessments, and project reviews to ensure that hazardous fuels management is accomplished expeditiously and in an environmentally sound manner.

(b) Definitions.—In this section:

(1) Biomass-to-energy facility.—The term "biomass-to-energy facility" means a facility that uses biomass as a raw material to produce electric energy, useful heat, or a transportation fuel.

(2) Eligible community.—The term "eligible community" means—

(A) any town, township, municipality, or other similar unit of local government (as determined by the Secretary), or any area represented by a nonprofit corporation or institution organized under Federal or State law to promote broad-based economic development, that—

(i) has a population of not more than 10,000 individuals;

(ii) is located within a county in which at least 15 percent of the total primary and secondary labor and proprietor income is derived from forestry, wood products, and forest-related industries, such as recreation, forage production, and tourism; and

(iii) is located near forest land, the condition of which land the Secretary determines poses a substantial present or potential hazard to the safety of—

(I) a forest ecosystem;

(II) wildlife; or

(III) in the case of a wildfire, human, community, or firefighter safety, in a year in which drought conditions are present; and

(B) any county that is not contained within a metropolitan statistical area that meets the conditions described in clauses (ii) and (iii) of subparagraph (A).

(3) Forest biomass.—The term "forest biomass" means fuel and biomass accumulation from precommercial thinnings, slash, and brush on forest land of the United States.

(4) Hazardous fuel.—

(A) In general.—The term "hazardous fuel" means any excessive accumulation of organic material on public and private forest land (especially land in an urban-wildland interface area or in an area that is located near an eligible community and designated as condition class 2 under the report of the Forest Service entitled 'Protecting People and Sustainable Resources in Fire-Adapted Ecosystems', dated October 13, 2000, or that is designated as condition class 3 under that report) that the Secretary determines poses a substantial present or potential hazard to the safety of—

(i) a forest ecosystem;

(ii) wildlife; or

(iii) in the case of wildfire, human, community, or firefighter safety, in a year in which drought conditions are present.

(B) Exclusion.—The term "hazardous fuel" does not include forest biomass.

(6) Secretary.—The term "Secretary" means—

(A) the Secretary of Agriculture (or a designee), with respect to National Forest System land and private land in the United States; and

(B) the Secretary of the Interior (or a designee) with respect to Federal land under the jurisdiction of the Secretary of the Interior or an Indian tribe.

(c) Hazardous Fuel Grant Program.—

(A) In general.—Subject to the availability of appropriations, the Secretary may make grants to persons that operate biomass-to-energy facilities to offset the costs incurred by those persons in purchasing hazardous fuels derived from public and private forest land adjacent to eligible communities.

(B) Selection criteria.—The Secretary shall select recipients for grants under subparagraph (A) based on—

(i) planned purchases by the recipients of hazardous fuels, as demonstrated by the recipient through the submission to the Secretary of such assurances as the Secretary may require; and

(ii) the level of anticipated benefits of those purchases in reducing the risk of wildfires.

(2) Grant amounts.—

(A) In general.—A grant under this subsection shall—

(i) be based on—

(I) the distance required to transport hazardous fuels to a biomass-to-energy facility; and

(II) the cost of removal of hazardous fuels; and

(ii) be in an amount that is at least equal to the product obtained by multiplying—

(I) the number of tons of hazardous fuels delivered to a grant recipient; by

(II) an amount that is at least $5 but not more than $10 per ton of hazardous fuels, as determined by the Secretary taking into consideration the factors described in clause (i).

(B) Limitation on individual grants.—

(i) In general.—Except as provided in clause (ii), a grant under subparagraph (A) shall not exceed $1,500,000 for any biomass-to-energy facility for any year.

(ii) Small biomass-to-energy facilities.—A biomass-to-energy facility that has an annual production of 5 megawatts or less shall not be subject to the limitation under clause (i).

(3) Monitoring of grant recipient activities.—

(A) In general.—As a condition of receipt of a grant under this subsection, a grant recipient shall keep such records as the Secretary may require, including records that—

(i) completely and accurately disclose the use of grant funds; and

(ii) describe all transactions involved in the purchase of hazardous fuels derived from forest land.

(B) Access.—On notice by the Secretary, the operator of a biomass-to-energy facility that purchases hazardous fuels, or uses hazardous fuels purchased, with funds from a grant under this subsection shall provide the Secretary with—

(i) reasonable access to the biomass-to-facility; and

(ii) an opportunity to examine the inventory and records of the biomass-to-energy facility.

(4) Monitoring of effect of treatments.—The Secretary shall monitor Federal land from which hazardous fuels are removed and sold to a biomass-to-energy facility under this subsection to determine and document the reduction in fire hazards on that land.

(5) Authorization of appropriations.—There is authorized to be appropriated to carry out this subsection $50,000,000 for each fiscal year.

(d) Long-Term Forest Stewardship Contracts for Hazardous Fuels Removal.—

(1) Annual assessment of treatment acreage.—

(A) In general.—Subject to the availability of appropriations, not later than March 1 of each of fiscal years 2002 through 2006, the Secretary shall submit to Congress an assessment of the number of acres of Federal forest land recommended to be treated during the subsequent fiscal year using stewardship end result contracts authorized by paragraph (3).

(2) FUNDING RECOMMENDATION.—The Secretary shall include in the annual assessment under paragraph (1) a request for funds sufficient to implement the recommendations contained in the assessment using stewardship end result contracts described in paragraph (3) in any case in which the Secretary determines that the objectives of the National Fire Plan would best be accomplished through forest stewardship end result contracting.

(3) STEWARDSHIP END RESULT CONTRACTING.—

(A) IN GENERAL.—Subject to the availability of appropriations, the Secretary may enter into stewardship end result contracts to implement the National Fire Plan on National Forest System land based on the stewardship treatment schedules provided in the annual assessments conducted under paragraph (1).

(B) PERIOD OF CONTRACTS.—The contracting goals and authorities described in subsections (b) through (g) of section 347 of the Department of the Interior and Related Agencies Appropriations Act, 1999 (commonly known as the 'Stewardship End Result Contracting Demonstration Project') (16 U.S.C. 2104 note; Public Law 105-277), shall apply to contracts entered into under this paragraph, except that the period of each such contract shall be 10 years.

S. CON. RES. 80

Whereas clean water is a natural resource of tremendous value and importance to the United States;

Whereas there is resounding public support for protecting and enhancing the quality of the rivers, streams, lakes, wetland, and marine water of the United States;

Whereas maintaining and improving water quality is essential to protecting public health, fisheries, wildlife, and watersheds, and to ensuring abundant opportunities for public recreation and economic development;

Whereas it is a national responsibility to provide clean water for future generations;

Whereas substantial progress has been made in protecting and enhancing water quality since the date of enactment, in 1972, of the Federal Water Pollution Control Act (33 U.S.C. 1251 et seq.) due to concerted efforts by Federal, State, and local governments, the private sector, and the public;

Whereas serious water pollution problems persist throughout the United States and significant challenges lie ahead in the effort to protect water resources from point sources and nonpoint sources of pollution;

Whereas further development and innovation of water pollution control programs and advancement of water pollution control research, technology, and education are necessary and desirable; and

Whereas October 2002 is the 30th anniversary of the enactment of the Federal Water Pollution Control Act (33 U.S.C. 1251 et seq.): Now, therefore be it

Resolved by the Senate (the House of Representatives concurring), That, as the United States marks the 30th anniversary, in October 2002, of the enactment of the Federal Water Pollution Control Act (33 U.S.C. 1251 et seq.), Congress encourages the people of the United States and all levels of government to recognize and celebrate the accomplishments of the United States under, and to recommit to achieving the goals of, that Act.

HONORARY CITIZENSHIP FOR PAUL YVES ROCH GILBERT DU MOTIER

The PRESIDING OFFICER. The clerk will state the joint resolution by title.

There being no objection, the Senate proceeded to consider the joint resolution.

Mr. LEAHY. Mr. President, I am pleased to cosponsor this resolution to grant honorary citizenship to the Marquis de Lafayette.

Aside from being a hero of the American Revolution, the Marquis de Lafayette is known for the grand tour he took of the new Republic in the 1820's. During his visit to Vermont in 1825, a town was renamed as Fayetteville until it was changed again to Newfane in 1882.

He also laid the cornerstone of the Old Mill, a historic building on the University of Vermont's campus. The school now honors his memory with a statue on campus.

It is not inappropriate, at a time when we are engaged in a struggle against international terrorism, we recall that even in our infancy, this country has always had friends and allies from other parts of the world. After two hundred years, the world has gotten smaller and our international allies and coalition partners are essential to our long term success in the difficult times ahead. We should never forget this nation's friends.

Mr. REID. Mr. President, I ask unanimous consent that the joint resolution be read the third time, and passed, the preamble be agreed to, the motion to reconsider be laid upon the table, and that any statements relating thereto be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The joint resolution (S.J. Res. 13) was read the third time and passed.

The preamble was agreed to.

The joint resolution, with its preamble, reads as follows:

S.J. RES. 13

Whereas the United States has conferred honorary citizenship on four other occasions in more than 200 years of its independence, and honorary citizenship is and should remain an extraordinary honor not lightly conferred nor frequently granted;

Whereas Paul Yves Roch Gilbert du Motier, also known as the Marquis de Lafayette or General Lafayette, voluntarily put forth his own money and risked his life for the freedom of Americans;

Whereas the Marquis de Lafayette, by an Act of Congress, was voted to the rank of Major General;

Whereas, during the Revolutionary War, General Lafayette was wounded at the Battle of Brandywine, demonstrating bravery that forever endeared him to the American soldiers;

Whereas the Marquis de Lafayette secured the help of France to aid the United States' colonists against Great Britain;

Whereas the Marquis de Lafayette was conferred the honor of honorary citizenship by the Commonwealth of Virginia and the State of Maryland;

Whereas the Marquis de Lafayette was the first foreign dignitary to address Congress, an honor which was accorded to him upon his return to the United States in 1824;

Whereas, upon his death, both the House of Representatives and the Senate draped their chambers in black as a demonstration of respect and gratitude for his contribution to the independence of the United States;

Whereas an American flag has flown over his grave in France since his death and has not been removed, even while France was occupied by Nazi Germany during World War II; and

Whereas the Marquis de Lafayette gave aid to the United States in her time of need and is forever a symbol of freedom: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That Paul Yves Roch Gilbert du Motier, also known as the Marquis de Lafayette, is proclaimed to be an honorary citizen of the United States of America.

The PRESIDING OFFICER. Without objection, it is so ordered.

The joint resolution (S.J. Res. 8) was read the third time and passed.

The preamble was agreed to.

The joint resolution, with its preamble, reads as follows:

S.J. RES. 8

Whereas the study of fossils has shown that the rose has been a native wild flower in the United States for over 35,000,000 years;

Whereas the rose is grown today in every State;

Whereas the rose has long represented love, friendship, beauty, peace, and the devotion of the American people to their country;

Whereas the rose has been cultivated and grown in gardens for over 5,000 years and is referred to in both the Old and New Testaments;

Whereas the rose has for many years been the favorite flower of the American people, has captivated the affection of humankind, and has been revered and renowned in art, music, and literature;

Whereas our first President was also our first rose breeder, 1 of his varieties being named after his mother and still being grown today; and

Whereas in 1986 the rose was designated and adopted as the national floral emblem of the United States: Now, therefore, be it

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. Mr. President, I appreciate everyone's cooperation. I know the hour is late. It is a very difficult bill for everyone, but I do appreciate the cooperation tonight.

The PRESIDING OFFICER. The Senator from Alabama.

WANTING A FARM BILL

Mr. SESSIONS. Mr. President, I have the permission of the Senator from Arkansas to go first.

I do take offense at the distinguished Senator from Iowa, Mr. HARKIN, saying we do not want a farm bill. That is not true. I do want a farm bill. I do not think there is a Senator here who does not want one, and I would like to see one completed before we leave.

I have been talking to farmers back home in my State, and they tell me frankly they like Cochran-Roberts. I am pleased to support the amendment that Senator HUTCHINSON has offered that has the House structure with some additional language in it that we think makes the bill even better. That was my farm bill that I offered, along with Senator HUTCHINSON and four Democrats. There were four Democrats and three Republicans on that bill. I believe the Presiding Officer was on that bill. It was a good bipartisan bill.

As the bill went through the system, the committee dealt with it and the majority leader dealt with it, and pretty soon we had a bill that was not as balanced as we would like to see it.

A lot of people in this Senate who care about agriculture—and there are some other than Senator HARKIN—are really concerned about the legislation and want a good bill.

Senator COCHRAN from Mississippi who chair the Agriculture Appropriations Subcommittee is one of the most knowledgeable people in this Senate on agricultural issues.

Senator PAT ROBERTS chaired the House Committee on Agriculture and is one of the most knowledgeable people in this Senate on agriculture.

Senator LUGAR, the former chairman of the Agriculture Committee and one of the finest Members of this body, is not comfortable with this legislation, and he certainly, as a farmer, cares about agriculture. So does Senator GRASSLEY who spoke earlier, a farmer himself, and a senior member of the Agriculture Committee.

They just do not agree with Senator HARKIN on everything that is in a bill that he admits is not perfect.

What we ought to do, and what I would have expected to happen, is that these responsible, experienced Senators and farm experts would be able to get together and work out some of the problems and not end up with a problem with the House and a problem with the President.

How are we going to get a bill passed if it cannot be conferenced? How are we going to get a bill passed if the President vetoes it? It is not going to happen. Let's get together now. That is the problem.

My farmers are telling me they believe all three of these bills can help them. They like all three of these bills, but we have to look at it in terms of a national policy and work out something with which everybody can work.

The problem has been, frankly, that the majority has not shown enough respect, in my view, to Senators COCHRAN, ROBERTS, GRASSLEY and LUGAR who have been trying to make some improvements in the bill. They have not talked to them on any significant issue, only minor issues, and we end up at loggerheads. The President is very unhappy with what he sees.

Even if we pass something before we leave, if it is not legislation that is likely to move forward, we have not done anything. That is why I appreciate Senator HUTCHINSON's offering of our original bipartisan bill that we know can get through the House, and we believe the President will sign it. I believe we will have a farm bill in a matter of days—hours, really. That would be good for agriculture.

The people with whom I have talked are concerned about delay. They would like this bill passed as soon as possible. They want to make their plans for next year. They want to talk with their banks and see about the financing they will need. We do need to move as fast as possible.

It would be quite preferable for us to move and have a bill passed that the President would sign before we recess. There is no doubt about that. I would like to see that done. But Senator HARKIN and the majority leader are basically saying: Take our bill just as we have written it, even though we have a vote or two over 50 for it, but we will not talk with you.

I have seen Senator DASCHLE when he was the Democratic leader use the power of 40 votes and ask for compromise and get it time and again. That is what this body is about. I just have not seen enough progress in a bipartisan way here. I believe there has just been an effort to stampede this bill through to try to gin up people and say: The Harkin bill is the only one that can do the job, and it must be passed now; and if you do not pass the Harkin bill now, you do not care about farmers, you do not care about agriculture, you would just as soon leave them out there and let them go bankrupt. That is just not true. I resent that.

I come from a farming family. My daddy had a farm equipment dealership. My grandparents were farmers. I grew up in the country. I know about farming. I have seen them come into my daddy's business with a tractor broken down, with hay in the field, a hay baler not working, needing help, knowing if the rain came and they did not get the crop in, they could lose most everything. And we did not have the programs then that we have today. I understand that. I grew up in that community. I want a farm bill, and I do not like it when somebody says I do not. And I do not like it when they say: If you do not agree with me and agree to vote on a bill I want on which we will accept no significant amendments, then we are going to accuse you of being against agriculture. I do not believe that is right.

That is where we are, and everybody knows it. There is no mystery about where this deal is tonight.

I want to make one more point.

There are several problems with the Harkin bill. From what I am hearing, other people are also expressing those concerns. It seems to me that the Harkin bill will increase production at a time when our production is high. And if it goes higher it will be even harder to sustain legitimate crop prices. That is a real problem. We have pretty high production now. Cotton is up. None is down that I know of. We don't need to institutionalize or create an incentive to do that.

We want to do this thing in a way that does not leave us subject to the charge of the Europeans who say we are protectionists and that we are violating WTO commitments. If we can avoid violating them and accomplish the same thing, we ought to do it. I hope and pray that the Europeans will see their extraordinary subsidies for agriculture are not justified. I hope they will begin to reduce some of that, and we will see increased exports around the world in other places besides Europe.

If we can avoid it, we ought not violate our trade agreements. I am afraid in a few years the experts will say we are in violation of our international trade commitments, putting us at a disadvantage when we try to negotiate with our trading partners who I think have been violating the law consistently. We will not be as authoritative with the same moral basis to argue they need to get right with the law.

We need a bill that can go to conference and be signed by the President promptly. That is why I believe the legislation Senator HUTCHINSON has offered tonight is a good vehicle for that.

There are two ways we can get a farm bill as I see it, just like this. We can have a good-faith, compromise negotiation discussion between the slim majority and the leaders on this side who are fine people, fine Senators, who have a history, a record, and a career of supporting agriculture—Senators GRASSLEY, ROBERTS, COCHRAN—and talk with them and see if they cannot work out something. If they do not, we have another vehicle, a vehicle Senator HUTCHINSON would offer, to solve the problem. Those are the two ways. Maybe there will be another and cloture will be achieved.

I know one thing: If we did those two things, we would be out of here and we would have a bill the President would most likely sign and we would have fulfilled our duty.

I yield the floor.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. HUTCHINSON. I thank the distinguished Senator from Alabama for his cosponsorship of this legislation and for his excellent statement. I also commend the Presiding Officer this evening for his role and hard work on the peanut program and his great victory on that issue and his hard work on the Agriculture bill and for his willingness to stay this late. I am sure the Presiding Officer is ready to wind this up.

I wish my colleagues could have seen the farmers I met with this past Saturday. One asked the prospects for getting a bill completed and to the President. I began to explain the Senate process. We have cloture; we may not get it. If we get it, we get a bill that has to go to conference. There is a lot of difference between the House and the Senate. I explained that and their eyes glazed over. There were tears. They said that would not do a lot of good for making loans and plans and getting ready for the upcoming planting season.

We have reached the point of finger pointing, both sides saying the other does not want a bill this year. I suggest Senator SESSIONS outlined two ways we have a chance of getting one. They are genuine compromises. We can pass the House bill I filed this evening, which I urged in my floor speeches we move this year. I wrote Chairman HARKIN and urged quick action and voted for the Harkin commodity title, and voted for the committee bill, voted for cloture last week; I voted for cloture today. I want a farm bill.

The way I see it, Senator HARKIN made a significant admission and said, if we invoke cloture and pass his bill tomorrow night, it will be weeks before a conference can work out the differences between the House and Senate and get a bill to the President.

There were a lot of Democrats who voted against Cochran-Roberts. But do we say a lot of Democrats do not want a farm bill because they would not support that? Of course not. We all have ideas of what the ideal farm bill is. We cannot get an ideal farm bill in these closing days. None of us would know exactly what it was.

There is one way we can get a bill this year. That is to move this House-like bill cosponsored by Republicans and Democrats—four Democrats, three Republicans—and move it immediately to the President. Tomorrow we will find out who is really wanting a bill this year and who is really wanting to stall one out—whether it is pride of authorship: my bill is the only bill, or whether we are willing to get an improvement in farm policy under this budget and to the President and signed into law.

I hope tomorrow there is good news this Christmas for America's farmers.

I thank the Presiding Officer for his patience, and I yield the floor.
